SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 714e4c10

Ruth Asawa was an accomplished artist who worked in many art forms, including her unique tied-wire sculptures, but she was dedicated to more than the creation of art. Asawa also wanted to bring art to children in her hometown of San Francisco, California. To that end, in 1968 she cofounded the Alvarado School Arts Workshop, which brought works of art and artists into public schools, and in 1982 she helped found a San Francisco public arts high school, which was later named after her.

Which choice best states the main idea of the text?

- A. Asawa inspired many other artists to share their work with students in public schools.
- B. Asawa’s unique sculptures were appreciated more by local art communities than they were nationwide.
- C. Asawa’s interest in art education prompted her to create art programs for students in San Francisco.
- D. Asawa left a promising career as a sculptor to work as an art teacher in San Francisco schools.

ID: 714e4c10 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by establishing Ruth Asawa as an artist who worked in several art forms but emphasizes that she was interested in art for reasons other than her desire to create it. The text mentions two ways in which Asawa brought art to children through public schools: cofounding the Alvarado School Arts Workshop in 1968 and helping found a public arts high school in 1982. Thus, the main idea is that Asawa’s interest in art education motivated her to establish arts programs for students in San Francisco.

Choice A is incorrect because the text doesn’t mention Asawa inspiring other artists to share their work with students. While the text does note that the Alvarado School Arts Workshop brought works of art and artists into public schools, it doesn’t state that Asawa motivated these artists. Choice B is incorrect because the text makes no comparison between local and national appreciation of Asawa’s sculptures. While the text does mention that Asawa created unique tied-wire sculptures and was connected to San Francisco, it does not contrast her local and national critical receptions. Choice D is incorrect. Although the text emphasizes Asawa’s educational initiatives, it doesn’t state or imply that she abandoned her career as a sculptor to work as an art teacher. Instead, the text portrays her educational work as a complement to her career as a successful artist.

Percentage of US Congress Members Who Self-Identified as Veterans, 1953-2023

Since the nation’s earliest days, both houses of the United States Congress have counted many military veterans among their elected officials, including Hiram L. Fong (who served in the US Army Air Force) and Ralph Harold Metcalfe Sr. (who served in the US Army). A research institute gathered historical data about congressional members who have reported past military experience and determined that _____

Which choice most effectively uses data from the graph to complete the sentence?

- A. from 2003 to 2023, the House of Representatives had a higher percentage of those members than the Senate did.
- B. from 1953 to 2003, those members constituted a majority in both houses of Congress.
- C. the percentage of those members decreased substantially in both houses of Congress from 1973 to 2013.
- D. the percentage of those members remained fairly consistent, regardless of house, from 1993 to 2023.

ID: 3dc911d6 Answer

Correct Answer:
C

Rationale
Choice C is the best answer because it accurately uses data from the graph to complete the statement regarding the research institute’s findings about veteran representation in Congress. The graph shows that the percentage of veterans in both houses of Congress decreased dramatically from 1973 to 2013. In 1973, the House of Representatives consisted of approximately 74%

veterans, and the Senate was made up of approximately 79% veterans. By 2013, veteran members of both houses had fallen to approximately 17%–18%. This represents a substantial decrease of more than 50% in each house over this 40-year period.

Choice A is incorrect because from 2003 to 2023, the House of Representatives did not consistently have a higher percentage of veterans than the Senate did. According to the graph, in 2003 the Senate was made up of approximately 35% veterans, while the House consisted of approximately 23% veterans. In 2013, the number of veterans in the Senate was still slightly higher (approximately 18%) than in the House (approximately 17%). Only in 2023 did the House have a marginally higher percentage than the Senate. Choice B is incorrect because veterans did not constitute a majority in both houses throughout the entire period shown in the graph from 1953 to 2003. According to the graph, both houses had a majority of veterans in 1953 (approximately 62% in the House and approximately 74% in the Senate) and in 1973 (approximately 74% in the House and approximately 79% in the Senate), but by 1993 the House had fallen below 50% to approximately 40% veterans. By 2003, both houses were well below 50%. Choice D is incorrect because the percentage of veterans in Congress did not remain consistent from 1993 to 2023. The graph shows significant changes in the number of members reporting past military service during this period, particularly the continued decline from 1993 to 2003. In 1993, the House had approximately 40% veterans and the Senate had approximately 63% veterans, but by 2003 these percentages had dropped to approximately 23% and 35%, respectively. Furthermore, there was a large gap between the two houses in 1993 that narrowed considerably by 2013, which contradicts the claim that the percentage of veterans across both houses “remained fairly consistent” during this period.

ID: 1755eaf0

Like many other genera of wild bees, bumblebees have in recent decades experienced population collapse caused by, among other factors, habitat destruction and climate variation. Bumblebees are also one of the most researched bee genera, second only to honeybees. As a result, ecologists have gained much of their insight about wild-bee declines from bumblebees. In a 2021 paper, zoologist Guillaume Ghisbain notes that bumblebees are among the relatively few wild-bee genera that display social behaviors and dietary generalism (ability to obtain nectar and pollen from a diversity of plant species), two traits that are associated with increased resilience to some specific environmental changes. Ghisbain therefore contends that _____

Which choice most logically completes the text?

- A.

although bumblebees and many other wild bees have experienced similar population declines in the past, compared with other wild bees, bumblebees are likely at greater risk of being harmed by climate variation than by habitat destruction.
- B.

although bumblebees have been more extensively studied than most wild bees, researchers should not use bumblebees to draw conclusions about the decline of other wild bees, even ones with feeding patterns and levels of sociability that are similar to those of bumblebees.
- C.

because bumblebees and other bees with generalist diets are less negatively affected by environmental stress than bees with specialized diets are, they are less likely to experience major population changes in the future than bees with specialized diets are.
- D.

because the responses of bumblebees and other wild bees to environmental threats are not always comparable, researchers need to exercise caution when extrapolating information about wild-bee population declines from bumblebees.

ID: 1755eaf0 Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of wild-bee declines. The text establishes that bumblebees and other wild bees have been experiencing population collapse as a result of habitat destruction, climate variation, and other factors. The text then indicates that because bumblebees are very extensively researched, ecologists rely heavily on findings about them to understand wild-bee declines in general. However, the text then introduces Ghisbain’s observation that unlike most other wild-bee genera, bumblebees have certain traits (social behaviors and dietary generalism) linked to increased resilience to certain environmental changes. In other words, bumblebees aren’t necessarily representative of wild bees as a whole because they are likely more tolerant of some pressures. Therefore, it logically follows that Ghisbain would urge researchers to exercise caution when using bumblebee data to draw conclusions about other wild-bee population declines, since bumblebees and other wild bees don’t always respond comparably to environmental threats.

Choice A is incorrect because the text doesn’t indicate that climate variation is more of a threat to bumblebees than habitat destruction is or that it is a bigger threat to bumblebees than it is to other wild bees. The text simply indicates that climate variation and habitat destruction are among the factors that have caused population collapses for bumblebees and other wild-bee genera. Choice B is incorrect. As it is presented in the text, Ghisbain notes that bumblebees may respond to environmental changes differently than many other wild-bee genera do; this suggests that bumblebees shouldn’t be treated as representative of all wild bees, but there’s no reason to think that Ghisbain would go so far as to assert that bumblebee data shouldn’t be used to draw conclusions about other wild-bee genera that are similar to bumblebees in their dietary and social traits, even if there are relatively few. The text suggests caution in extrapolation, not a complete rejection of using bumblebee research. Choice C is

incorrect. Although the text indicates that dietary generalism is linked to increased resilience to specific environmental changes (that is, to some but not all environmental stresses), it doesn't suggest that bumblebees and other bees with this trait are less likely than bees with specialized diets to experience major population changes. In fact, the text makes it clear that like many other wild-bee genera—most of which don't display dietary generalism—bumblebees are already experiencing population collapse.

ID: 0a77c362

“Aunt Sue’s Stories” is a 1926 poem by Langston Hughes. In the poem, the speaker indicates that the stories Aunt Sue tells are based on Aunt Sue’s personal experiences, saying that _____

Which choice most effectively uses a quotation from “Aunt Sue’s Stories” to illustrate the claim?

- A. dark shadows “cross and recross / Aunt Sue’s stories.”
- B. a listening child “knows that Aunt Sue / Never got her stories out of any book at all, / But that they came / Right out of her own life.”
- C. the stories are told during “Summer nights on the front porch.”
- D. the people in the stories “Mingle themselves softly / In the flow of old Aunt Sue’s voice, / Mingle themselves softly.”

ID: 0a77c362 Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most effectively illustrates the speaker of the poem’s claim that the stories Aunt Sue tells are based on Aunt Sue’s personal experiences. In the quotation, the speaker conveys the listening child’s point of view that Aunt Sue’s stories originate from her personal experiences and are not taken from books or other external sources. The listening child explicitly contrasts two possible sources for Aunt Sue’s stories: a book (whose potentially fictitious stories are implied to be written by someone else) or “her own life.” By having the child confidently assert that Aunt Sue “never got her stories out of any book at all,” the speaker indicates that Aunt Sue’s stories are instead informed by her lived experiences.

Choice A is incorrect because it describes an element or image that recurs within Aunt Sue’s stories rather than indicating that these stories have a real-life basis. The reference to dark shadows that “cross and recross” the stories functions as imagery on a literal, visual level and may also evoke figurative darkness, but this detail by itself doesn’t suggest that the stories are based on Aunt Sue’s personal experiences. Choice C is incorrect because it identifies the setting of Aunt Sue’s storytelling rather than describing the real-life basis of the stories themselves. The quotation states that Aunt Sue tells her stories on “summer nights on the front porch,” which establishes when and where the storytelling occurs; however, no information is provided about the origins of the stories that Aunt Sue tells within this setting. Choice D is incorrect because it describes the movement or circulation of characters in the stories as Aunt Sue speaks rather than establishing that these stories have a real-life basis. The quotation primarily evokes the sounds of Aunt Sue’s voice and the seemingly easy “flow” of this voice in her storytelling. Although the characters who “mingle...in the flow of old Aunt Sue’s voice” are to some extent created or animated by her voice, no information is provided about the characters themselves or their relationship to Aunt Sue’s actual experiences.

SAT	Reading and Writing	Information and Ideas	Inferences	

ID: d95a0bb8

The ratio of methane to other atmospheric constituents—represented by a measure called the methane mole fraction—influences a variety of meteorological phenomena, notably precipitation and humidity. For Titan, Saturn’s largest moon, the observational data that exist are too sparse and discrepant to fully constrain the range of the methane mole fraction at various atmospheric levels. Juan Lora and colleagues point out that outputs of the IPSL atmospheric model of Titan, which track closely to observations in some respects, reflect how the model’s developers responded to this challenge: by prescribing a uniform methane mole fraction for the lowest level of the atmosphere. It is therefore important to note that _____

Which choice most logically completes the text?

- A. some disagreements between the model’s simulations of Titan’s precipitation and humidity and the moon’s actual precipitation and humidity are to be expected.
- B. further observations of Titan may clarify the moon’s methane mole fraction sufficiently for the model to employ a single value rather than a range.
- C. even though the model’s outputs sometimes agree with observational data, Titan’s real methane mole fraction is likely higher than the methane mole fraction used in the model.
- D. inconsistencies across the model’s simulations of Titan’s precipitation and humidity could be attributable to variations in the moon’s methane mole fraction.

ID: d95a0bb8 Answer

Correct Answer:
A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of modeling the atmosphere of Titan. The text establishes that the methane mole fraction (the ratio of methane to other atmospheric components) influences precipitation, humidity, and other meteorological phenomena and that observational data for Titan are too lacking (“too sparse and discrepant”) to fully determine the range of this measure across the moon’s various atmospheric levels. The text indicates that because of this limitation, researchers developed an atmospheric model (IPSL) that uses a simplified approach: it applies a uniform methane mole fraction for the lowest atmospheric level. Since it is very unlikely that the actual methane distribution across atmospheric levels on Titan is uniform, and since the methane mole fraction directly affects precipitation and humidity, it logically follows that the model’s simplified treatment of the methane mole fraction would lead to some disagreements between the model’s simulations and Titan’s actual precipitation and humidity.

Choice B is incorrect because the text makes it clear that the model *already* uses a single value for Titan’s methane mole fraction instead of a range. Further, the text suggests that the single value is a simplification of what is likely a more complex reality, so there’s no reason to assume that a single value would be more desirable than a range. Choice C is incorrect. The text strongly suggests that Titan’s actual methane mole fraction differs from the uniform value used in the model, even though some of the model’s outputs align closely with observations, but nothing in the text indicates how the actual value would differ. There’s no reason to assume that the actual methane mole fraction is higher than what the model uses. The “lowest level” mentioned in the text refers to the atmosphere and not Titan’s methane mole fraction. Choice D is incorrect because the text makes it clear that the model *doesn’t* reflect the actual variations in the methane mole fraction across Titan’s atmospheric levels, since observational data are too limited. Because the model uniformly applies a set methane mole fraction, no inconsistencies in the simulations would be attributable to actual variations in the moon’s methane mole fraction.

Census Data for Four Canadian Cities,
1871-1901

The first national census in Canada was conducted in 1871. The graph shows the population sizes of some of the largest Canadian cities from each of the first four national censuses, which occurred every ten years.

According to the graph, which city had the largest population in 1891?

- A. Toronto
- B. Montréal
- C. Québec City
- D. Halifax

ID: 239d3535 Answer

Correct Answer:
B

Rationale

Choice B is the best answer because the graph shows that Montréal had the largest population in 1891 among the four cities represented. According to the data points in the graph for the year 1891, Montréal's population was approximately 220,000, which is greater than the respective populations of Toronto (approximately 180,000), Québec City (approximately 60,000), and Halifax (approximately 40,000).

Choice A is incorrect because Toronto's population in 1891 was approximately 180,000, which is the second largest among the four cities shown but still clearly smaller than Montréal's population of approximately 220,000. Choice C is incorrect because Québec City had a population of approximately 60,000 in 1891, making it only the third largest of the four cities shown. Choice D is incorrect because Halifax had a population of approximately 40,000 people in 1891. Of the four cities shown in the graph, Halifax has the smallest population, not the largest.

Question Difficulty:

Easy

Question ID b168ce48

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b168ce48

The average age at which people in the United States start businesses is 35. Economist Andrés Hincapié studied why young adults are relatively less likely to start businesses and whether there are ways to increase entrepreneurship in early adulthood. Hincapié found that one impediment is lack of knowledge about the practical details of how businesses are started; he further found that simply providing young adults with good informational resources on the topic significantly alleviates this problem.

Based on the text, what would Hincapié most likely say is a promising way to increase entrepreneurship in early adulthood?

- A. Creating social networks of young adults who are interested in starting a business
- B. Encouraging young adults to brainstorm business ideas
- C. Providing young adults with practical information about how to start a business
- D. Giving young adults training opportunities at a variety of businesses

ID: b168ce48 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it presents a conclusion about increasing entrepreneurship in early adulthood that can be reasonably inferred from the text. The text explains that Andrés Hincapié investigated why young adults are less likely than older adults to start businesses and found that lack of knowledge of practical aspects of starting a business is a barrier. The text then states that Hincapié found that providing relevant informational resources greatly helps address that problem. Offering young adults practical information about how to start a business would be an example of providing relevant informational resources, so Hincapié would most likely say it is a promising way to increase early adult entrepreneurship.

Choice A is incorrect because creating social networks of young adults interested (but presumably inexperienced) in starting a business wouldn't involve a clear source of practical information for those young adults, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship. Choice B is incorrect because encouraging young people to brainstorm business ideas wouldn't involve a clear source of practical information for those young adults, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship. Choice D is incorrect because providing young adults with training opportunities at existing businesses would give those young people exposure to businesses that already exist but not necessarily information about how to start a business, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship.

Question ID b29c520a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: b29c520a

A team of researchers used bacteria to create a biofuel (a renewable fuel produced from plants, algae, or other living materials). The team called the new fuel POP biofuel. To determine how much energy is stored in POP biofuel compared to other fuels, the team calculated the fuels’ energy density, in megajoules per liter (MJ/L). The team found that the fuel with the highest energy density is _____

Which choice most effectively uses data from the graph to complete the sentence?

- A. jet fuel.
- B. POP biofuel.
- C. ethanol.
- D. gasoline.

ID: b29c520a Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it most effectively uses data from the graph to complete the sentence about which fuel has the highest energy density. Of the four bars in the graph, the highest (indicating the greatest energy density in MJ/L) is for POP biofuel. According to the graph, the energy densities of the fuels shown are approximately 40 MJ/L for POP biofuel, 36 MJ/L for gasoline, 34 MJ/L for jet fuel, and 23 MJ/L for ethanol.

Choice A is incorrect. The task is to find the fuel in the graph with the highest bar (indicating the greatest energy density in MJ/L), and jet fuel has the third-highest bar in the graph, not the highest. According to the graph, the energy densities of the fuels shown are approximately 40 MJ/L for POP biofuel, 36 MJ/L for gasoline, 34 MJ/L for jet fuel, and 23 MJ/L for ethanol. Choice C is incorrect. The task is to find the fuel in the graph with the highest bar (indicating the greatest energy density in MJ/L), and ethanol has the lowest bar in the graph, not the highest. According to the graph, the energy densities of the fuels shown are approximately 40 MJ/L for POP biofuel, 36 MJ/L for gasoline, 34 MJ/L for jet fuel, and 23 MJ/L for ethanol. Choice D is incorrect. The task is to find the fuel in the graph with the highest bar (indicating the greatest energy density in MJ/L), and gasoline has the second-highest bar in the graph, not the highest. According to the graph, the energy densities of the fuels shown are approximately 40 MJ/L for POP biofuel, 36 MJ/L for gasoline, 34 MJ/L for jet fuel, and 23 MJ/L for ethanol.

Question ID c9708e7d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Inferences	

ID: c9708e7d

In Switzerland, the white fuzzy mountain flowers known as edelweiss are widely treated as a symbol of strength and courage. Although edelweiss can thrive in extreme conditions, they aren't notably tougher or harder to reach than other mountain flowers growing in the Swiss Alps. Historian Tobias Scheidegger has shown that the popular view of the flowers originated in the mid-1800s when mountain climbing became popular in Switzerland. Mountain climbers spread the idea that the flowers grew only in steep, icy terrains that were dangerous to climb to. Scheidegger says that these claims were self-interested. He suggests that mountain climbers presented edelweiss in this way in order to _____

Which choice most logically completes the text?

- A. make themselves appear brave and strong for being able to climb to difficult places where edelweiss supposedly grew.
- B. encourage more flower enthusiasts to explore the Swiss Alps.
- C. share their observations about the unusual characteristics of edelweiss with scientists.
- D. prove that edelweiss were more common in the Swiss Alps than in other mountain regions in Europe.

ID: c9708e7d Answer

Correct Answer:
A

Rationale

Choice A is the best answer because it most logically completes the text's discussion of mountain climbers' motivations for exaggerating the difficulty of reaching edelweiss. The text establishes that edelweiss became symbols of strength and courage in Switzerland in the mid-1800s. The text goes on to state that mountain climbing became popular around the same time and that climbers spread the false idea that the flowers grew only in dangerous, hard-to-reach locations. According to the text, historian Tobias Scheidegger argues that these claims were "self-interested," meaning they served the climbers' own purposes. The text therefore implies that by claiming that edelweiss could be found only in perilous locations, mountain climbers could enhance their own reputations: climbers who encountered edelweiss would appear to have undertaken a dangerous journey, thereby making themselves seem brave and strong.

Choice B is incorrect because making edelweiss seem more dangerous to reach than other mountain flowers are would likely discourage flower enthusiasts from trying to reach edelweiss rather than encourage them to explore the Swiss Alps. The text suggests that climbers' self-interested motivation for exaggerating the difficulty of climbing to areas where edelweiss grew was to enhance their own reputations for being especially brave, not to promote tourism in the Swiss Alps. Choice C is incorrect because the text states that according to Scheidegger, mountain climbers exaggerated the difficulty of reaching edelweiss for self-interested reasons, not because they wanted to report genuine scientific observations about the flower's unique characteristics. The text provides no indication that the climbers sincerely believed that their claims about the especially challenging terrain in which edelweiss grew were accurate, much less that they wanted to share this information with scientists. Choice D is incorrect because the text doesn't suggest that mountain climbers were trying to prove that edelweiss were more common in Switzerland than elsewhere. The text's focus is on the supposed difficulty and danger of reaching the flowers, not on their relative abundance in the Swiss Alps compared to other regions. In fact, the text implies that mountain climbers exaggerated how difficult edelweiss were to reach; it therefore wouldn't make sense to say that they exaggerated this difficulty to demonstrate that edelweiss were relatively common.

Question Difficulty:
Medium

Question ID dcca0dfc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: dcca0dfc

The following text is from Mick Herron’s 2023 novel *The Secret Hours*. The narrator is describing members of a government committee.

Finally, and adding much-needed gravitas, was Sir Winston Day, whose features seemed moulded to adorn a bust, or possibly a stamp, and whose forehead was so evidently bulging with grey matter that it would have been impertinent to inquire too closely into the actual achievements his half century of public service had produced. His recently published memoirs possibly cast light on this enigma, but given that such details were not provided until after the thirty-page mark, they might as well have remained state secrets.

©2023 by Mick Herron

Based on the text, which choice best describes Sir Winston Day?

- A. He has the appearance of a distinguished figure, but it is uncertain whether he has accomplished anything to earn distinction.
- B. He looks like a person worthy of respect, but his memoirs reveal that some of his actions were dishonorable.
- C. He would be a celebrated public figure if his achievements did not have to be kept secret.
- D. He has maintained a modest profile even though he has served the public capably for many years.

ID: dcca0dfc Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it accurately describes Sir Winston Day as he is portrayed in the text. The text indicates that Sir Winston’s “features seemed moulded to adorn a bust, or possibly a stamp,” suggesting that he appeared distinguished. But the text also indicates that his “actual achievements” during his long public service constitute an “enigma,” or mystery, highlighting the point with a joke about Sir Winston’s uninteresting memoirs (any information about his achievements past the first thirty pages “might as well have remained state secrets” since, it’s implied, no one bothered to read that far). Thus, the text suggests that Sir Winston appears distinguished even though his known accomplishments, if any, are relatively few.

Choice B is incorrect because nothing in the text indicates that Sir Winston behaved dishonorably. Rather, the text indicates that his “actual achievements” during his long public service constitute an enigma, or mystery, suggesting that he may have done very little, not that what he has done was disreputable. Choice C is incorrect. Although the text says that Sir Winston’s achievements that appear “after the thirty-page mark” in his memoirs “might as well have remained state secrets,” this is a joke about the public’s lack of interest in the memoirs, not a sincere claim that secrecy was intended. Choice D is incorrect because the text does not associate Sir Winston with modesty, nor does it suggest that he was a capable public servant. Rather, by indicating that Sir Winston’s “features seemed moulded to adorn a bust, or possibly a stamp,” the text suggests that Sir Winston’s appearance communicated importance, not modesty. The text further indicates that his “actual achievements” during his long public service constitute an enigma, or mystery, suggesting that he may have done very little, not that he was particularly capable.

Question ID 4411e15b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: 4411e15b

Fiber Characteristics of Mouflon, Navajo-Churro, and Spanish Merino Sheep

Type of sheep	Diameter of outer coat fibers (in microns)	Diameter of inner coat fibers (in microns)
Spanish Merino	19–24	17–21
Navajo-Churro	35 or higher	10–35
Mouflon	150	15

Domestic sheep’s wild ancestor, the mouflon, has a coarse outer coat and an inner coat of wool fiber that is finer in diameter and therefore much softer. In some domestic breeds, such as the Spanish Merino, the outer fiber is only marginally coarser than the inner, and the wool is soft overall. Thus, Merino wool is ideal for delicate garments worn against the skin. Meanwhile, the Navajo-Churro has been selected to retain the marked distinction between outer and inner fiber that the Merino has lost. Being coarser than Merino wool overall, Navajo-Churro wool yields a more durable yarn, which Diné (Navajo) weavers use in their celebrated rugs. Yet a comparison of the fiber characteristics of all three sheep reveals that _____

Which choice most effectively uses data from the table to complete the text?

- A. the selection process that enabled the Navajo-Churro to retain its somewhat coarse outer fiber also resulted in inner fiber that, at its softest, is softer than either the mouflon’s or the Merino’s inner fiber.
- B. the Navajo-Churro more closely resembles its ancestor, the mouflon, in the uniform softness of its inner fiber, while the Merino more closely resembles the mouflon in the variable diameter of its outer fiber.
- C. domestication resulted in a counterintuitive increase in the inner fiber’s minimum diameter, making the inner fiber of the Merino and the Navajo-Churro less suitable for delicate garments than the mouflon’s inner fiber is.
- D. the domestication of the mouflon and the subsequent selection process that produced the Merino and the Navajo-Churro resulted in greater softness of outer and inner fiber alike.

ID: 4411e15b Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it accurately uses data from the table to complete the statement about the fibers of three types of sheep. The text discusses some qualities of outer and inner fibers of mouflons, Spanish Merino sheep, and Navajo-Churro sheep and indicates that sheep fibers with finer, or smaller, diameters are softer than fibers with larger diameters. The text then sets up a conclusion that can be made by comparing the fibers of all three sheep types. The table shows that the minimum diameter of the Navajo-Churro’s inner fibers is 10 microns, which is smaller than the minimum diameters of the inner fibers of both the mouflon (15 microns) and the Spanish Merino (17 microns). Thus, comparing the fiber characteristics of all three sheep reveals that at its softest, the inner fiber of the Navajo-Churro is softer than either the mouflon’s or the Merino’s inner fiber.

Choice B is incorrect because it doesn’t accurately describe the data in the table. The table shows that the softness of Navajo-Churro inner fiber isn’t uniform (since the diameter of Navajo-Churro inner fiber ranges from 10 microns to 35 microns) and that the diameter of the outer fiber of the mouflon isn’t variable (rather, it is a uniform 150 microns). Choice C is incorrect because it doesn’t accurately describe the data in the table. The text indicates that both Spanish Merino sheep and Navajo-Churro sheep were domesticated from mouflon sheep. The table doesn’t show that domestication increased the minimum diameter of inner

fibers for both Spanish Merino sheep and Navajo-Churro sheep from the 15-micron diameter of mouflon inner fibers: the minimum diameter of Spanish Merino increased to 17 microns, but the minimum diameter of Navajo-Churro inner fibers *decreased* to 10 microns. Choice D is incorrect because it doesn't accurately describe the data in the table. The text explains that sheep fibers with finer, or smaller, diameters are softer than fibers with larger diameters. The table does show that Spanish Merino outer fibers are finer, and thus softer, than mouflon outer fibers and that at their finest, Navajo-Churro outer fibers are softer than mouflon outer fibers, but it also shows that Spanish Merino inner fibers are less soft than mouflon inner fibers, since their minimum diameter is greater than 15 microns, and that Navajo-Churro inner fibers can be less soft than mouflon inner fibers, since the diameter ranges up to 35 microns.

Question ID d52fca9f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: d52fca9f

Many music streaming services also function as social media platforms: by giving users the option to follow friends and share curated playlists or information about their listening history, these platforms allow people to convey their music preferences and listening activities directly to their social networks. In a 2023 study, researcher Michael James Walsh interviewed frequent users of a popular music streaming platform to investigate how its social media dimensions shape their listening habits. Walsh found that these dimensions tended to make study participants feel more mindful of how their listening activities may be perceived, which in turn influenced how they managed those activities.

Which quotation from a music streaming platform user would best illustrate Walsh’s finding?

- A. “When I create playlists or choose songs to listen to, I often pick songs that I think the friends who are following me might be interested in listening to, rather than what I might actually prefer listening to in that moment.”
- B. “Because the predictions the platform makes about what new songs I might like depend on my past listening habits, at times its recommendations can feel overly repetitive and unvarying.”
- C. “The social aspects of music streaming make it really easy to create a sense of a shared listening experience with my friends, even if we aren’t in the same room.”
- D. “Listening to music through a streaming platform feels a lot more passive, since I don’t need to make any deliberate choices about what music I’m going to consume, like I do when buying digital downloads or records and CDs.”

ID: d52fca9f Answer

Correct Answer:
A

Rationale

Choice A is the best answer because it directly reflects both aspects of Walsh’s finding about the social media dimensions of music streaming platforms: that they make their users more mindful of how their listening activities may be perceived and that self-awareness then influences how users manage those activities. The quotation illustrates this by showing that the user considers the music preferences of their followers when selecting music (“songs that I think the friends who are following me might be interested in”), even if those choices differ from their own preferences (“rather than what I might actually prefer listening to in that moment”). This supports both aspects of Walsh’s finding: users have increased social awareness and deliberately change their listening habits based on that awareness.

Choice B is incorrect because it focuses on how the platform’s algorithmic recommendation system influences user choice, not on how the imagined opinions of other users might influence that choice. The quotation highlights a user’s concern about repetitive music recommendations based on their past listening behavior. It does not suggest that the user is adjusting their listening habits based on how they think others may perceive what they listen to. Choice C is incorrect because it focuses on the social connection that can be created by music streaming rather than illustrating how social awareness affects users’ management of their listening activities. While this quotation addresses the social dimensions of streaming platforms, it describes how these features create shared experiences rather than demonstrating how concern about others’ perceptions influences users’ listening choices. Choice D is incorrect because it compares streaming platforms to traditional music purchasing methods. This comparison doesn’t address the social media dimensions of streaming platforms or how awareness of others’ perceptions of music selections influences what users choose to listen to.

Question ID b633cc4f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b633cc4f

Few animals are known to spit: among them are humans, cobras, and camels. But in January 2022 at a nature preserve in southern England, bird-watcher Clare Jacobs observed a gray seal spitting a jet of water at a white-tailed eagle flying overhead. Seals had never been seen spitting before. Biologist Sean Twiss, who studies gray seals, believes that the seal may have been attempting to scare the eagle away from a food source or that the seal may have just been playing.

Which choice best states the main topic of the text?

- A. Bird-watching in southern England
- B. A previously unseen behavior of gray seals
- C. How white-tailed eagles defend their territory against other predators
- D. Differences between gray seals and white-tailed eagles

ID: b633cc4f Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it most accurately states the main topic of the text. The text begins by noting that few animals are known to spit, and then it focuses on Clare Jacobs’s January 2022 observation of a gray seal spitting water at a white-tailed eagle. The text explicitly notes that this behavior had never before been observed in seals, highlighting that this was a previously unseen behavior. The text concludes with biologist Sean Twiss’s hypotheses about why the seal might have been spitting. Thus, the main topic is the observation of a previously unseen behavior (spitting) of gray seals.

Choice A is incorrect because while the text does mention bird-watcher Clare Jacobs making an observation in southern England, bird-watching itself is not the main topic. The reference to bird-watching is incidental to the central focus of the novel behavior of a gray seal spitting water at an eagle. Choice C is incorrect because the text only mentions a white-tailed eagle as the target of a seal’s spitting behavior; it doesn’t provide any information about how these eagles typically behave when defending territory or interacting with other predators. Choice D is incorrect because the text doesn’t discuss differences between gray seals and white-tailed eagles. While both animals are mentioned, the text is focused on the seal’s unusual spitting behavior rather than comparing the two animals in any way.

Banded Sand Catsharks Found in Three Sponges

Researcher Helen O'Neill and her team were studying sponges in the family Irciniidae when they discovered that three of the sponges were functioning as microhabitats for banded sand catsharks (*Atelomycterus fasciatus*). Additionally, the team found that male and female *A. fasciatus* share the same sponge (the same microhabitat), a behavior not found among Port Jackson sharks (*Heterodontus portusjacksoni*), another seabed-dwelling species.

Which choice best describes data from the graph that support the underlined claim?

- A. Each of the three sponges was inhabited by at least one male *A. fasciatus* and at least one undetermined *A. fasciatus*.
- B. Sponge 1 was inhabited by 17 male *A. fasciatus*.
- C. Each of the three sponges was inhabited by at least one male *A. fasciatus* and at least one female *A. fasciatus*.
- D. Sponge 1 was inhabited by 13 female *A. fasciatus*.

ID: 6af80ff3 Answer

Correct Answer:

C

Rationale

Choice C is the best answer because it accurately describes data from the graph that support the claim that the team found that male and female *Atelomycterus fasciatus* (banded sand catsharks) share the same sponge. The graph presents the number of male, female, and undetermined banded sand catsharks found in each of three sponges—sponge 1, sponge 2, and sponge 3. The graph shows that approximately 17 male sharks and 13 female sharks were found in sponge 1, approximately 1 male shark and 2 female sharks were found in sponge 2, and approximately 2 male sharks and 1 female shark were found in sponge 3. Thus, the graph shows that male and female sharks were found sharing the same sponges.

Choice A is incorrect because the graph shows that one of the sponges (sponge 1) was *not* inhabited by any undetermined banded sand catsharks. Additionally, this choice doesn't give any information about female sharks, so it can't support the claim that male and female sharks are actually found in the same sponge. Choice B is incorrect because it doesn't give any information about female sharks. The graph does show that approximately 17 male banded sand catsharks inhabited sponge 1, but that information alone can't support the claim that male and female sharks are found in the same sponge. Choice D is incorrect because it doesn't give any information about male banded sand catsharks. The graph does show that approximately 13 female banded sand catsharks inhabited sponge 1, but that information alone can't support the claim that male and female sharks are found in the same sponge.

Question Difficulty:

Medium

Question ID 72cbdbc6

SAT	Reading and Writing	Information and Ideas	Inferences	

ID: 72cbdbc6

Researchers Eugeni Vidal-Tortosa and Robin Lovelace looked at the relationship between street lighting in a city and people’s willingness to ride a bicycle. Their results suggest that poor street lighting can deter new or inexperienced cyclists from riding in a city but has little effect on experienced cyclists. Therefore, increasing the number of streetlights in a city could potentially _____

Which choice most logically completes the text?

- A. decrease the number of new or inexperienced cyclists riding in the city.
- B. increase the number of experienced cyclists riding in the city.
- C. decrease the number of experienced cyclists riding in the city.
- D. increase the number of new or inexperienced cyclists riding in the city.

ID: 72cbdbc6 Answer

Correct Answer:
D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of the relationship between street lighting and people’s cycling behavior. According to the text, Eugeni Vidal-Tortosa and Robin Lovelace found that poor street lighting deters new or inexperienced cyclists from riding their bikes in a city but has little effect on experienced cyclists. This finding establishes a causal relationship between street lighting and the willingness of new or inexperienced cyclists to ride a bicycle in the city: if poor lighting discourages new or inexperienced cyclists from riding, then improving lighting conditions by increasing the number of streetlights would logically remove this deterrent, potentially leading to an increase in the number of new or inexperienced cyclists willing to ride in the city.

Choice A is incorrect because it contradicts the logical relationship established in the text. If poor street lighting deters new or inexperienced cyclists from riding in the city, then increasing the number of streetlights (improving lighting conditions) would be expected to encourage more of these cyclists to ride, not decrease their numbers. Choice B is incorrect because the text explicitly states that street lighting didn’t have an effect on experienced cyclists. If lighting conditions don’t significantly influence experienced cyclists’ decisions to ride, then increasing the number of streetlights wouldn’t necessarily increase the number of experienced cyclists riding in the city. Choice C is incorrect. The text indicates that street lighting didn’t affect experienced cyclists, so increasing the number of streetlights wouldn’t decrease the participation of these cyclists. Instead, their numbers would be expected to remain about the same.

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 0fd96039

It has long been thought that the original author of the US Pledge of Allegiance was Francis Bellamy, who said that he wrote the pledge one evening in August of 1892. But a historian recently discovered a newspaper article that was published several months before August 1892. The article describes students reciting the same pledge that Bellamy claims he first wrote in August. This means that Bellamy may not have created the pledge after all.

Based on the text, what piece of knowledge about the Pledge of Allegiance has recently become uncertain?

- A. How many changes were made to the pledge in the 1900s
- B. The identity of the person who first wrote the pledge
- C. The name of the newspaper that first published the pledge
- D. Which part of the pledge students liked best in 1892

ID: 0fd96039 Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it presents a supposed fact about the Pledge of Allegiance that, as the text explains, has recently become uncertain. The text begins by explaining the long-held belief that the original author of the US Pledge of Allegiance was Francis Bellamy, who claimed to have written it in August 1892. The text then describes a historian’s recent discovery of a newspaper article published several months before August 1892 that mentions students reciting the same pledge. The text concludes that this discovery suggests Bellamy may not have created the pledge after all. Thus, what has recently become uncertain is the identity of the person who first wrote the pledge.

Choice A is incorrect because the text doesn’t address any changes made to the Pledge of Allegiance in the 1900s. The text focuses solely on the question of who originally authored the pledge in or before 1892 and doesn’t mention any subsequent modifications to its wording. Choice C is incorrect. While the text does mention a historian’s discovery of a newspaper article that described students reciting the pledge, it doesn’t suggest that the pledge was published in its entirety within that article. Moreover, the text doesn’t identify the newspaper by name or suggest the possibility of an earlier mention of the pledge in a different newspaper. Choice D is incorrect because the text doesn’t mention which parts of the Pledge of Allegiance students preferred in 1892 or at any other time. The text only states that a newspaper article described students reciting the pledge, without providing any information about their preferences regarding different portions of it.

ID: 45c03837

Outi Tervo and team studied the effect of human-caused noise on narwhals (*Monodon monoceros*), arctic marine mammals that are sensitive to acoustic changes in their environment. Hypothesizing that elevated sound levels affect foraging among narwhals, Tervo’s team compared narwhal diving behaviors in natural sound conditions with those behaviors in two human-caused sound exposure conditions—ship sounds and ship sounds coupled with sonic pulses. Both exposure conditions resulted in significant decreases in the number and target depth of deep dives (associated with foraging) relative to natural conditions. However, differences between diving behaviors in the two exposure types were negligible, a finding that could be attributed to the fact that _____

Which choice most logically completes the text?

- A. sonic pulses can be heard at significantly greater ocean depths than ship sounds can.
- B. ship sounds contribute so much to the overall sound level that the addition of sonic pulses has little effect on the narwhals’ auditory environment.
- C. narwhals forage at shallower depths in the presence of ship sounds alone than in the presence of ship sounds coupled with sonic pulses.
- D. the narwhals weren’t as sensitive to human-caused sounds as the researchers had predicted.

ID: 45c03837 Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of human-caused noise and narwhal behavior. The text establishes that Outi Tervo and team found that while both ship sounds alone and ship sounds coupled with sonic pulses significantly affected narwhal foraging behaviors compared to natural conditions, there were negligible differences between the narwhals’ responses to the two sound exposure types (a somewhat surprising finding because one might expect that adding sonic pulses would have an even greater impact). It logically follows that if ship sounds are already so loud that adding sonic pulses to them doesn’t substantially increase the level of human-caused sound exposure, the two conditions would produce essentially the same behavioral responses because the additional sonic pulses are essentially irrelevant.

Choice A is incorrect because the fact that sonic pulses are audible at greater depths than are ship sounds would be more likely to help explain a difference—not a similarity—in how the narwhals responded to the two types of sound exposure. If at some points during the study the narwhals were at depths where only sonic pulses (but not ship sounds) could be heard, then they might be expected to alter their diving behavior more dramatically in response to those pulses. But since the text reports negligible differences between diving behaviors in the two exposure types, the fact that sonic pulses reach greater depths than do ship sounds has little explanatory power in this context. Choice C is incorrect because the idea that the narwhals foraged at shallower depths in one of the two exposure conditions directly contradicts the information given in the text. The text states that there were negligible differences in the narwhals’ diving behaviors between the two conditions, meaning that the behaviors were essentially the same. Choice D is incorrect. Although the text states that two conditions with human-caused sounds (ship sounds alone and ship sounds coupled with sonic pulses) had essentially the same effect on narwhals’ deep dives, this indicates only that sonic pulses didn’t meaningfully change the effect of ship sounds, not that the narwhals were less sensitive to human-caused sounds than predicted. Indeed, the text makes it clear that the sounds significantly altered the narwhals’ behavior.

Question ID 0b634641

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: 0b634641

Researchers Kate Howlett and Edgar Turner asked 401 schoolchildren in the United Kingdom to draw and label local wildlife. The researchers suggest that the children may be more aware of mammals than of other animals in their environments.

Which choice best describes data from the graph that support the researchers’ conclusion?

- A. There were about as many drawings with an example of an insect as there were with an example of a bird.
- B. The fewest number of drawings contained an example of a bird.
- C. More of the drawings had an example of an insect than an example of a mammal.
- D. More of the drawings had an example of a mammal than either an example of a bird or an example of an insect.

ID: 0b634641 Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it accurately describes data from the graph that support the researchers’ conclusion that children may be more aware of mammals than of other animals. The graph presents the percent of drawings by schoolchildren that contained an example of an animal from a certain group (mammals, birds, or insects). The graph shows that approximately 80% of the drawings contained an example of a mammal, while only approximately 69% contained an example of a bird and only about 55% contained an example of an insect. The fact that mammals were included in more drawings than either birds or insects were supports the idea that children may be particularly aware of mammals in their environments.

Choice A is incorrect because the graph shows that there were not "about as many" drawings with insects as there were drawings with birds (approximately 69% of the drawings included an example of a bird, while only about 55% included an example of an insect). Further, comparing only the numbers for birds and insects wouldn't indicate anything about the schoolchildren's awareness of mammals. Choice B is incorrect because the graph shows that insects, not birds, were the group that appeared in the fewest number of drawings (approximately 69% of the drawings included an example of a bird but only about 55% included an example of an insect). Further, stating that examples from one nonmammal group appeared in the fewest number of drawings would provide no evidence about the schoolchildren's awareness of mammals. Choice C is incorrect because the graph shows that more drawings had an example of a mammal than an example of an insect, not the other way around (approximately 80% of the drawings included an example of a mammal, while only about 55% included an example of an insect). Further, examples of a nonmammal group appearing in more drawings than examples of mammals did would actually weaken the claim that schoolchildren may be more aware of mammals than of other animals.

Easy

Question ID 73caa3ab

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 73caa3ab

The following text is from Mark Haber’s 2022 novel *Saint Sebastian’s Abyss*. The narrator and Schmidt are both art critics.

When my first wife admitted to Schmidt over dinner that she didn’t find art, painting in particular, especially compelling, Schmidt winced, set down his fork, and sighed dramatically; he then excused himself, explaining an appointment he’d forgotten about had suddenly and inexplicably been remembered, while making it abundantly clear there was no appointment at all.

©2022 by Mark Haber

- Based on the text, what is notable about Schmidt’s behavior?
- A. Schmidt is only given to theatrical behavior when in the company of the narrator and his first wife.
 - B. Schmidt’s absentmindedness regarding his schedule is uncharacteristic of him.
 - C. Schmidt’s departure is occasioned by the resumption of a previous disagreement with the narrator’s first wife about a particular painting.
 - D. Schmidt conveys his feelings about one of his dining companions without explicitly stating them.

ID: 73caa3ab Answer

Correct Answer:
D

Rationale

Choice D is the best answer because it most accurately describes what is notable about Schmidt’s behavior. According to the text, when the narrator’s first wife admits she doesn’t find art particularly compelling, Schmidt responds by wincing, sighing dramatically, and abruptly leaving dinner with an obviously false excuse about a remembered appointment. The narrator makes it clear that there is no actual appointment and that the excuse is merely a pretense. Through these actions—the physical reactions of wincing and sighing, followed by the transparent excuse to leave—Schmidt clearly communicates his disapproval of the wife without directly stating his feelings about her.

Choice A is incorrect because the text provides no evidence that Schmidt’s theatrical behavior—wincing, sighing dramatically, and abruptly leaving dinner—is unique to situations involving the narrator and his first wife. The text describes only one interaction involving Schmidt, so there’s no basis for determining whether his dramatic reactions are typical of him in all situations or limited to this particular social context. Choice B is incorrect because nothing in the text suggests that Schmidt is typically mindful of his schedule or that forgetting appointments would be uncharacteristic of him. Rather, the text makes it clear that Schmidt hasn’t actually forgotten an appointment at all—the narrator indicates that Schmidt’s reason for leaving is an obvious fabrication, not a genuine instance of absentmindedness. Choice C is incorrect because the text doesn’t mention any previous disagreement between Schmidt and the narrator’s first wife about a particular painting or any other topic. The text presents what appears to be a spontaneous reaction by Schmidt to the wife’s statement about not finding art compelling, not the continuation of an earlier conversation or dispute.

Question ID 251e5281

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 251e5281

Studies of ocean wave breaking have predominantly focused on traveling waves (those propagating along the horizontal plane), so Mark McAllister et al. utilized a circular wave tank to produce and study spike waves, axisymmetric standing waves that can erupt vertically when traveling waves propagating in opposing directions intersect. Traveling waves break when wave steepness (height-to-length ratio) passes a critical threshold; breaking thus constrains wave height. McAllister et al. found that spike waves can exceed that constraint, as other factors than just steepness (e.g., jet stability and cavity shape) mediate spike-wave breaking.

Which choice best states the main idea of the text?

- A.

Previous studies have suggested that steepness mediates breaking in traveling waves, but the study by McAllister et al. shows that jet stability and cavity shape may also influence breaking in such waves.
- B.

The process of breaking limits the height of traveling waves, but the study by McAllister et al. suggests that spike waves can exceed those limits if their height-to-length ratio reaches a critical threshold.
- C.

McAllister et al. suggest that spike waves can form when traveling waves propagating in opposing directions intersect and that spike waves tend to be higher than traveling waves.
- D.

The study by McAllister et al. suggests that when traveling waves intersect in specific ways, the resulting wave may be higher than would be expected based on the properties of traveling waves.

ID: 251e5281 Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text begins by explaining that most studies of ocean wave breaking have focused on traveling waves (those that move horizontally) but that McAllister et al. studied spike waves, which form when traveling waves moving in opposing directions intersect. The text establishes that while traveling waves break when their steepness exceeds a critical threshold (limiting their height), McAllister et al. found that spike waves can exceed these constraints because factors like jet stability and cavity shape can mitigate the effects of steepness. Thus, the main idea of the text is that spike waves resulting from traveling waves intersecting in specific ways can reach heights greater than what would be expected based on the general properties of traveling waves.

Choice A is incorrect because it misrepresents the information in the text; the text indicates that McAllister et al. showed that jet stability and cavity shape (along with steepness) influence breaking in spike waves, not in traveling waves. Further, the information about specific influences is not the main focus of the text. Choice B is incorrect because it misrepresents the information in the text; the text indicates that McAllister et al. found that spike waves can pass the steepness threshold at which traveling waves break because factors like jet stability and cavity shape affect the breaking of spike waves, not because they’ve simply reached a critical threshold of steepness. Choice C is incorrect. Although the text does explain that spike waves can form when traveling waves intersect, it presents this as a known fact that McAllister et al.’s study was based on, not as something the researchers suggested. Further, the text indicates that spike waves can exceed a threshold that limits traveling wave height but doesn’t focus on the idea that spike waves typically are higher than traveling waves.

Hard

Question ID ead0fd9b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Inferences	

ID: ead0fd9b

A typical string quartet consists of two violin players, a viola player, and a cello player. When a string quartet performs, one violinist and the cellist usually sit facing the audience. The violist and the other violinist usually sit facing each other. This seating arrangement causes the viola’s carved sound openings, or f-holes, to be angled away from the audience. Therefore, if the viola player has a musical solo and wants to make sure that the audience can hear it clearly, the violist typically _____

Which choice most logically completes the text?

- A. instructs the other members of the quartet to play louder.
- B. plays at the same volume as the cellist.
- C. shifts position in order to face outwards toward the audience.
- D. looks at the sheet music instead of looking at the audience.

ID: ead0fd9b Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of how a violist in a string quartet might behave to ensure their instrument can be heard clearly by the audience during a solo. According to the text, such quartets consist of two violins, a viola, and a cello, configured as follows: the cellist and one of the violinists both face the audience, while the other violinist and the violist face each other. In other words, the viola and its f-holes, or sound openings, are “angled away from the audience,” just as the musician playing the instrument is. As the text implies, the f-holes are crucial for projecting sound, so this positioning reduces the volume of the viola as perceived by the audience and in turn presents a dilemma during a solo, in which the viola should be heard clearly above the other instruments in the quartet. Therefore, during a viola solo, the violist would most logically adjust their position and face the audience directly, thereby projecting the sound emerging from the instrument’s f-holes toward listeners. This adjustment would maximize the viola’s sound for the benefit of the audience for the duration of the solo.

Choice A is incorrect because the text’s discussion is about how a violist in a string quartet behaves to ensure that their instrument can be heard clearly by the audience during a solo, given the orientation of this instrument in a typical string quartet configuration, and a soloist would want the viola to be more prominent relative to the other instruments in this context, not less prominent. Therefore, it wouldn’t be sensible for the violist to instruct the other members of the quartet to play louder during the solo. Choice B is incorrect because the text’s discussion is about how a violist behaves to ensure that their instrument can be heard clearly by the audience during a solo, given the orientation of this instrument in a typical string quartet configuration, and a violist would want the viola to be more prominent and therefore louder relative to all the other instruments. Therefore, it wouldn’t be sensible for the violist to play at the same volume as the cellist during a solo. Choice D is incorrect. While a violist might very well look at the sheet music during a solo to ensure they are playing the piece correctly, the direction that a musician looks in doesn’t determine how effectively the sound of their instrument is projected to the audience. If, as the text stipulates, a violist wants to ensure that their instrument can be heard clearly, given the orientation of the viola in the typical seating configuration of a string quartet, then the violist would likely change their physical orientation, facing toward the audience and therefore angling the viola’s f-holes in that direction during the solo.

Question Difficulty:
Easy

Question ID daa90829

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: daa90829

The following text is adapted from Fanny Burney’s 1778 novel *Evelina*. The text is an excerpt from a letter by Lady Howard to Evelina’s guardian, Reverend Villars, in which Lady Howard discusses an upcoming trip to London planned by her daughter Mrs. Mirvan’s family.

It is very earnestly [the Mirvans’] wish to enlarge and enliven their party by the addition of your amiable ward, who would share, equally with her own daughter, the care and attention of Mrs. Mirvan. Do not start at this proposal; it is time that [Evelina] should see something of the world. When young people are too rigidly sequestered from it, their lively and romantic imaginations paint it to them as a paradise of which they have been beguiled; but when they are shown it properly, and in due time, they see it such as it really is, equally shared by pain and pleasure, hope and disappointment.

Based on the text, Lady Howard would most likely agree with which statement about Reverend Villars?

- A. Although the manner in which he has raised Evelina is in many ways exemplary, he has been misguided in shielding her from the influence of other young people.
- B. He has imparted to Evelina his own idealistic view of the world, which results in her being unprepared to face inevitable disappointments.
- C. Although his desire to guard Evelina from unscrupulous people is commendable, his general mistrust has led him to be unduly wary of the Mirvans.
- D. He is overly protective of Evelina, who would likely benefit from a greater variety of experiences than she has had thus far.

ID: daa90829 Answer

Correct Answer:
D

Rationale

Choice D is the best answer because it presents a statement about Reverend Villars that Lady Howard would most likely agree with based on the text. In the text, Lady Howard urges Reverend Villars to allow his ward, Evelina, to join the Mirvans on a trip to London. Her first words after describing the Mirvans’ wish—“Do not start at this proposal”—suggest that she believes Villars will be alarmed by the idea, and she goes on to assure him that this alarm is unwarranted because Evelina will benefit from visiting London. Lady Howard supports her claim by arguing that excessive isolation from the world leads young people to entertain unrealistic, idealized views of it. On the other hand, she suggests, giving young people appropriate access to the world when they, like Evelina, are ready can help them develop a more balanced view of the world and its moral complexities. These words indicate that Lady Howard believes Evelina risks becoming too sheltered because of her guardian’s protectiveness and that she would benefit from exposure to a wider range of experiences than she has had thus far.

Choice A is incorrect because while the text does suggest that Lady Howard believes Reverend Villars has sheltered Evelina too much, it doesn’t specifically mention shielding her from the influence of other young people. Lady Howard refers more broadly to getting more exposure to the world and doesn’t focus on peer relationships. Additionally, the text doesn’t indicate whether Lady Howard finds other aspects of how Villars has raised Evelina to be exemplary. Choice B is incorrect because the text doesn’t suggest that Lady Howard believes Reverend Villars’s view of the world is idealistic or that he has imparted an idealistic view of the world to Evelina. While Lady Howard does warn that young people who are too sheltered may develop romantic, idealized views of the world, she presents this as a general principle about sheltered youth, not as a specific criticism of Villars for having transmitted a naïve outlook to Evelina. Choice C is incorrect because the text doesn’t mention Reverend Villars being specifically concerned about protecting Evelina from unscrupulous people or suggest that he is exceptionally wary of the Mirvans. While Lady

Howard’s words certainly anticipate some resistance from Villars, the text doesn’t specify the nature of his concerns beyond the general desire to protect Evelina from the world.

Founded in 1965 and originally established as a cultural extension of the United Farm Workers—a union representing many Mexican American agricultural workers at the time—the theater troupe El Teatro Campesino has achieved recognition as a source of inspiration for subsequent Chicano theater companies and as a contributor to the dramatic arts. In an article about the company, a theater historian posits that a significant stylistic influence on El Teatro’s early performances was the audience-mediated slapstick comedy of *carpa* theater, vaudeville-style shows popular in Mexico and the US Southwest in the 1920s and ’30s.

Which quotation from the article would best illustrate the theater historian’s claim?

- A. “The company presented *actos*, short comedy sketches, that often relied on exaggerated physical humor to groups of agricultural workers, whose reactions—enthusiastic cheers of appreciation and, occasionally, loud boos of disapproval—promoted improvisation.”
- B. “The company was focused on the reality of the present situation and discovered that humor was often found in that reality; consequently, comedy became a tool to convey social critique while entertaining and inspiring audiences.”
- C. “The company relied heavily on satire, humor, and references to contemporary popular culture as well as a make-do aesthetic—often referred to as *rasquache*—that reflected not only the troupe’s limited financial resources but also its sociopolitical message.”
- D. “The members of the company, which in addition to founder Luis Valdez consisted entirely of nonprofessional actors, traveled into farm fields, where they, with minimal props and costumes, performed comedy in the form of brief humorous vignettes.”

ID: 33b1b285 Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it most effectively illustrates the theater historian’s claim that El Teatro Campesino’s early performances were influenced stylistically by *carpa* theater, vaudeville-style shows with “audience-mediated slapstick comedy.” The quotation indicates that El Teatro presented comedic sketches that often featured exaggerated physical humor and that the performers improvised based on the cheers and boos from the audience; thus, it illustrates that El Teatro’s performances were similar to *carpa* theater in the physical, slapstick nature of their comedy and in the way the performances were mediated, or shaped, by the audience’s reactions.

Choice B is incorrect. Although the quotation refers to El Teatro’s use of comedy and mentions audiences, it focuses on the company’s use of comedic aspects of reality as a tool to critique society while providing audiences with entertainment and inspiration; it doesn’t give any indication that El Teatro’s performances featured slapstick, or very physical, comedy or that they were directly shaped by the audience. Choice C is incorrect. Although the quotation refers to El Teatro’s aesthetic, or style, and mentions comedy, it indicates only that the company relied on satire and humor and had a style that reflected their limited financial means and sociopolitical message; it doesn’t give any indication that El Teatro’s performances featured slapstick, or very physical, comedy or that they were directly shaped by the audience. Choice D is incorrect. Although the quotation refers to El Teatro’s performance of comedy, it mentions only that the company performed brief humorous vignettes, or short humorous scenes, in farm fields; it doesn’t give any indication that El Teatro’s performances featured slapstick, or very physical, comedy or that they were directly shaped by the audience.

ID: 38facbad

Studies conducted in individual Western societies have demonstrated associations between personality traits and five musical factors (mellowness, unpretentiousness, sophistication, intensity, and contemporariness) underlying individual preferences for styles of Western music. To investigate these associations across cultures, David M. Greenberg et al. collected music-preference assessments for Western genres and self-reported personality traits from participants in fifty-three countries across six continents. The study confirmed that the five-factor framework accurately captured participants’ tastes in Western music, and, moreover, the study found similar correlations between patterns of these factors and of personality traits, suggesting that _____

Which choice most logically completes the text?

- A. across cultural contexts, people who share similar profiles of personality traits tend to prefer listening to similar types of Western music.
- B. the five-factor framework can likely be used to predict preferences for non-Western music styles based on personality traits even if the characteristics of those styles substantially differ from characteristics of Western music styles.
- C. the strength of the relationship between personality traits and musical preferences varies less across cultures than researchers had previously assumed.
- D. people with a relatively high degree of familiarity with Western music styles are likely to express stronger preferences for those styles than people with a relatively low degree of familiarity with those styles are.

ID: 38facbad Answer

Correct Answer:
A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of the cross-cultural study on personality traits and music preferences. The text first explains that previous studies in individual Western societies had found links between personality traits and five musical factors that shape individual preferences for Western music styles. This finding suggests that people in those societies who have similar personality traits likely prefer listening to similar types of Western music. The text goes on to state that Greenberg et al. conducted a study that expanded this research to a broader, cross-cultural context (fifty-three countries across six continents). This study validated that the five-factor framework accurately represented participants’ preferences for Western music and that the study found patterns linking those preferences to personality traits. It follows, then, that people with similar profiles of personality traits tend to prefer similar types of Western music across cultural contexts.

Choice B is incorrect because Greenberg et al.’s study examined only preferences for Western music styles, so the text provides no basis for inferring that the five-factor framework could predict preferences for non-Western music styles. The study was specifically limited to Western musical styles, and extending the study’s findings to non-Western music would go beyond what the study investigated or supports. Choice C is incorrect because the text doesn’t mention what researchers had previously assumed about cultural variation in the strength of the relationship between personality traits and musical preferences. The text presents the cross-cultural consistency of the association between musical preferences and personality traits as a new finding but doesn’t mention previous expectations or assumptions about this association. Choice D is incorrect because the text doesn’t address familiarity with Western music styles or suggest that familiarity influences preference strength for those styles. Greenberg et al.’s study focused on the relationship between personality traits and musical preferences across cultural contexts, not on how exposure or familiarity might affect those preferences.

ID: ca9dc00f

In Diné (Navajo) culture, *ikaah* (sandpaintings) are created and then erased as part of sacred healing ceremonies lasting no more than a few days, but Diné *hataalii* (chanter, healer, cultural guide) Fred Stevens developed fixatives to preserve desacralized sandpaintings. While on a US-sponsored cultural ambassadorial trip in Europe and the Americas in the 1960s, Stevens produced several such sandpaintings and gave them to cultural institutions. This may seem in tension with the role of cultural ambassador—how could static objects authentically represent an inherently ephemeral and dynamic practice?—but such a view is itself overly object-focused and neglects how Stevens strove to convey exactly those characteristics of *ikaah* as a cultural practice.

Which quotation from an art historian would most directly support the claim made in the text?

- A. "While Stevens’s ambassadorial sandpaintings are undoubtedly educative for audiences that have little exposure to Diné culture, they should not be confused with authentic *ikaah*, which cannot be extricated from a practice that is intentionally and necessarily transitory nor condensed into a single persistent object."
- B. "The most compelling way to reconcile the apparent tension between the temporary and performative nature of *ikaah* and the persistent and static nature of Stevens’s ambassadorial sandpaintings is to recognize that Stevens was an ambassador not only of Diné culture but of a US art culture that tended to value permanent works over ephemeral ones."
- C. "Stevens’s ambassadorial sandpaintings are best understood not as self-contained objects but as reminders of the public creations of the sandpaintings, during which Stevens conducted appropriate *ikaah* rituals and encouraged viewers to closely track his movements and subtle shifts in the sand throughout the process."
- D. "It is important to recall Stevens’s own actions as a gift-giver—a temporary and performative role—of the sandpaintings, for by taking those actions, Stevens publicly enacted the transmission of knowledge of both traditional *ikaah* practices and cutting-edge chemistry (in the form of the preservative additives), a hybrid that reflects the dynamism of Diné culture."

ID: ca9dc00f Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most directly supports the text’s claim that Stevens strove to convey the ephemeral and dynamic characteristics of *ikaah* as a cultural practice. The text challenges the characterization of Stevens’s preserved sandpaintings as mere “static objects” that cannot “authentically represent” a practice defined in part by the absence of an end product; it claims instead that this “overly object-focused” interpretation overlooks how Stevens preserved the essential characteristics of traditional *ikaah* practice. This quotation supports the claim by explaining that Stevens’s sandpaintings should be understood “not as self-contained objects but as reminders of the public creations of the sandpaintings,” during which Stevens “conducted appropriate *ikaah* rituals and encouraged viewers to closely track his movements and subtle shifts in the sand throughout the process.” The fact that Stevens created the sandpaintings in a public setting and invited viewers to attentively engage with this process supports the claim that he sought to portray *ikaah* as a dynamic practice rather than as a static product. Further, the inherently impermanent nature of such a performance evokes the ephemerality that characterizes *ikaah*.

Choice A is incorrect because it contradicts rather than supports the text’s claim that Stevens strove to convey the ephemeral and dynamic characteristics of *ikaah* as a cultural practice. This quotation argues that Stevens’s preserved sandpaintings “should not be confused with authentic *ikaah*” and emphasizes that authentic *ikaah* “cannot be extricated from a practice that is intentionally and necessarily transitory.” This view aligns with the “overly object-focused” perspective that the text argues against, rather than supporting the claim that Stevens successfully conveyed *ikaah*’s ephemeral and dynamic characteristics. Choice B is incorrect

because it focuses on reconciling the tension between ephemeral and permanent forms rather than supporting the claim that Stevens actively conveyed *ikaah*'s ephemeral and dynamic characteristics. While this quotation acknowledges an apparent contradiction, it suggests that Stevens was accommodating US preferences for permanent artworks; it doesn't demonstrate how he communicated the ephemeral and dynamic nature of traditional *ikaah* practice. Choice D is incorrect. Although the quotation mentions Stevens's "temporary and performative role" as a gift-giver, it doesn't address how Stevens conveyed the ephemeral and dynamic characteristics of *ikaah* itself during his ambassadorial activities. The quotation focuses on Stevens's role in transmitting knowledge and representing cultural dynamism but doesn't specifically support the claim about his efforts to communicate the essential characteristics of *ikaah* practice. Further, the quotation incorrectly implies that Stevens shared his knowledge of preservative additives; the text doesn't establish that he revealed how the sandpaintings were preserved.

Olms are salamanders that live in underwater caves. Scientists once thought that olms stay in their caves all their lives. However, Raoul Manenti and team claim that olms regularly come to the surface to perform important activities such as finding food.

Which finding, if true, would most strongly support the underlined claim?

- A. Researchers determine that olms don't breed often.
- B. Researchers confirm that olms live in only a few cave systems.
- C. Researchers discover that earthworms from surface soils are a major part of olms' diet.
- D. Researchers learn that olms' brains differ from other salamanders' brains.

ID: 0021d326 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it presents a finding that, if true, would most strongly support Manenti and team's claim that olms regularly come to the surface to find food. The text explains that scientists previously believed olms remained in their underwater caves throughout their lives, but Manenti's team claims that olms actually surface regularly to perform important activities like finding food. Since earthworms from surface soils would not be present in underwater caves, the finding that such earthworms constitute a major part of olms' diet would provide compelling evidence that olms regularly leave their underwater cave environment to obtain food from the surface, thus supporting the underlined claim.

Choice A is incorrect because information about olms' breeding frequency wouldn't support the claim about their leaving their underwater habitats to obtain food. While breeding patterns might be relevant to understanding olm behavior in general, this finding doesn't address whether olms surface to find food, which is the specific behavior that the underlined claim addresses. Choice B is incorrect because learning that olms live in only a few cave systems wouldn't support the claim about their regular visits to the surface. This finding would provide information about the geographic distribution of olm habitats but wouldn't address whether olms leave these caves to find food or perform other activities on the surface. Choice D is incorrect because the differences between olms' brains and other salamanders' brains have no clear connection to olms' movement beyond their underwater habitats or to their feeding habits. A finding about the uniqueness of olms' brains wouldn't address whether olms leave their caves to find food or support Manenti and team's claim about olms' motivation for coming to the surface.

ID: f2208f98

When Kenyan writer Ngũgĩ wa Thiong’o, who had previously published four novels in English, began writing in his native language, Gĩkũyũ, in the 1970s, several fellow writers and critics cautioned that doing so might make his works inaccessible outside his own community. Some noted that Kiswahili—widely spoken in Kenya and elsewhere in Africa—would be a more practical choice. Rejecting their arguments, Ngũgĩ went on to author dozens of acclaimed works in Gĩkũyũ that have been translated into a total of more than thirty languages.

Which choice best states the main idea of the text?

- A.

The reaction to Ngũgĩ’s rejection of English illustrates that some literary experts believe that fame is most easily gained by writing in a widely understood language, such as Gĩkũyũ.
- B.

Although Ngũgĩ insisted on publishing his first works in Gĩkũyũ, they have since been translated into many other languages.
- C.

Although Ngũgĩ’s decision to write in Gĩkũyũ was met with some skepticism, it didn’t prevent him from achieving literary success.
- D.

In the 1970s, Ngũgĩ became convinced that literature ought to be written in authors’ native languages, and he proceeded to publish many works in Gĩkũyũ.

ID: f2208f98 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by explaining that Kenyan writer Ngũgĩ wa Thiong’o had published four novels in English before he began writing in his native language, Gĩkũyũ, in the 1970s. The text then explains that fellow writers and critics were skeptical of this decision, warning that the choice to publish in his native language, which the text implies isn’t widely understood, would limit his readership. The text concludes by stating that despite those warnings, Ngũgĩ proceeded to publish several acclaimed novels in Gĩkũyũ that were translated into several languages, suggesting that Ngũgĩ’s works in Gĩkũyũ achieved literary success in the forms of critical recognition and a wide international readership. Thus, the main idea is that although Ngũgĩ’s decision to write in Gĩkũyũ was met with some skepticism, this choice didn’t prevent him from achieving literary success.

Choice A is incorrect because it contradicts the description of Gĩkũyũ provided in the text. Rather than indicating that Gĩkũyũ is a widely understood language, as this choice claims, the text states that colleagues cautioned Ngũgĩ that writing in Gĩkũyũ instead of English “might make his works inaccessible outside his own community.” Furthermore, the text contrasts the choice of Gĩkũyũ with another alternative to English, Kiswahili, which the text indicates is “a more practical choice” given that it is “widely spoken in Kenya and elsewhere in Africa.” Choice B is incorrect because it contradicts information in the text. Although the text states that the novels Ngũgĩ published in Gĩkũyũ were later translated into other languages, the text explicitly states that Ngũgĩ had previously published four novels in English before he began writing in Gĩkũyũ in the 1970s. Thus, his first works were published in English, not Gĩkũyũ. Choice D is incorrect. The text doesn’t address what motivated Ngũgĩ’s choice to publish in his native Gĩkũyũ, and nothing in the text suggests that he intended for other authors to follow his example.

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: c088a9a9

Over the course of the 1900s, more and more Native Hawaiians spoke English instead of the Hawaiian language. To preserve their language, Native Hawaiian teachers founded the ‘Aha Pūnana Leo preschool in 1984. They spoke Hawaiian while teaching, and their Native Hawaiian students were soon able to understand and speak it themselves. The school was a huge success. Eventually it opened locations around Hawai‘i and started teaching Hawaiian to elementary and high school students too. Thanks to ‘Aha Pūnana Leo, the number of young people who speak the language has increased.

Which statement, if true, would most directly support the underlined claim?

- A. Fewer than fifty children could speak Hawaiian when ‘Aha Pūnana Leo was founded, but now more than 2,000 students at ‘Aha Pūnana Leo speak it.
- B. Roughly 680,000 Native Hawaiian people lived in the United States in 2020, and a little less than half of them lived in Hawai‘i.
- C. Hawaiian is very similar to other languages that are spoken on the Polynesian Islands of the Pacific Ocean, including Tahitian, Samoan, and Māori.
- D. Besides Native Hawaiians, tens of thousands of people from other Pacific Islander communities live in Hawai‘i today, including over 37,000 Samoans.

ID: c088a9a9 Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it presents a statement that, if true, would most directly support the claim that the number of young people who speak Hawaiian has increased because of the ‘Aha Pūnana Leo school. The text explains that Native Hawaiian teachers founded the school to help preserve the Hawaiian language by teaching it to children at a time when an increasing number of Native Hawaiians were speaking English instead. If it is true that when ‘Aha Pūnana Leo was founded fewer than fifty children could speak Hawaiian and that now over 2,000 students at the school can speak it, that would directly demonstrate that the school’s efforts have led to a greater number of young people speaking Hawaiian.

Choice B is incorrect because information about the total number and location of Native Hawaiian people in a single year wouldn’t reveal anything about the number of young speakers of Hawaiian (particularly since the text indicates that not all Native Hawaiians speak Hawaiian) or about the effect of the ‘Aha Pūnana Leo school on that number, so it wouldn’t have any bearing on the text’s claim. Choice C is incorrect because the fact that Hawaiian is similar to Tahitian, Samoan, Māori, and other languages of the Polynesian Islands wouldn’t reveal anything about the number of young speakers of Hawaiian or the effect of the ‘Aha Pūnana Leo school on that number, so it wouldn’t have any bearing on the text’s claim. Choice D is incorrect because information about non–Native Hawaiian people from Pacific Islander communities living in Hawai‘i today wouldn’t reveal anything about the number of young speakers of Hawaiian or the effect of the ‘Aha Pūnana Leo school on that number, so it wouldn’t have any bearing on the text’s claim.

Question Difficulty:

Easy

Question ID 54be8f96

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: 54be8f96

Properties of TRAPPIST-1 Exoplanets Compared to Earth's Properties

Planet	Orbital period (days)	Planet radius (Earth radii)
Earth	365.26	1
TRAPPIST-1b	1.51	1.09
TRAPPIST-1d	4.05	0.77
TRAPPIST-1e	6.1	0.92
TRAPPIST-1f	9.21	1.04

TRAPPIST-1 is a planetary system with a central red dwarf star and several Earth-sized exoplanets. Each planet in this system is so close in orbit to the star that the gravitational forces acting between the planet and the star cause the planet’s rotational period around its axis and orbital period around the star to be equal. For example, the orbital period of TRAPPIST-1e is _____

Which choice most effectively uses data from the table to complete the example?

- A. 1.51 days, which is the shortest rotational period of any of the TRAPPIST planets.
- B. 6.1 days, and its rotational period is also 6.1 days.
- C. 9.21 days, which is the same as the rotational period of TRAPPIST-1f.
- D. 6.1 days, and its rotational period is 0.92 days.

ID: 54be8f96 Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it correctly uses data from the table to illustrate the relationship between orbital and rotational periods described in the text. For Earth and each of four TRAPPIST-1 exoplanets, the table provides the orbital period and radius (in relation to the radius of Earth). The text explains that for each TRAPPIST-1 exoplanet, gravitational forces cause the rotational period (how long the planet takes to spin once on its axis) to equal the orbital period (how long the planet takes to orbit the star). According to the table, TRAPPIST-1e has an orbital period of 6.1 days. Since the text states that the orbital and rotational periods are equal for these planets, TRAPPIST-1e’s rotational period must also be 6.1 days.

Choice A is incorrect because the table shows that TRAPPIST-1e has an orbital period (and thus a rotational period) of 6.1 days, not 1.51 days, which is the orbital period (and thus the rotational period) of TRAPPIST-1b. Furthermore, comparing the length of TRAPPIST-1e’s rotational period to those of the other exoplanets would not logically complete the example, which should illustrate how the orbital and rotational periods of a planet in TRAPPIST-1 are the same length. Choice C is incorrect because the table shows that TRAPPIST-1e has an orbital period (and thus a rotational period) of 6.1 days, not 9.21 days, which the table shows is the orbital period (and thus rotational period) of TRAPPIST-1f. Additionally, comparing the rotational periods of two exoplanets would not logically complete the example, which should illustrate how the orbital and rotational periods of a planet in TRAPPIST-1 are the same length. Choice D is incorrect because although it correctly identifies TRAPPIST-1e’s orbital period as 6.1 days, it incorrectly states that its rotational period is 0.92 days. This contradicts the text’s statement that the orbital and rotational periods

are equal for TRAPPIST-1 exoplanets. The value 0.92 actually represents TRAPPIST-1e's radius in relation to Earth's radius, not its rotational period.

ID: 23974d6c

There are many famous examples of election pollsters making inaccurate predictions in presidential elections. But neuroscientist and election pollster Sam Wang has said that these prediction failures should not lead campaigns to _____ election polling entirely. Polling is about more than just predicting the winner; throughout campaigns, it helps strategists identify where their efforts are most likely to be effective.

Which choice completes the text with the most logical and precise word or phrase?

- A. distort
- B. enact
- C. neglect
- D. supplement

ID: 23974d6c Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of election polling. In this context, to “neglect” would mean to disregard or pay insufficient attention to something. The text states that there have been many cases of election pollsters incorrectly predicting presidential elections and then says that neuroscientist and pollster Sam Wang notes that campaigns shouldn’t react to these failures in a certain way. The text then adds that polls are valuable for informing strategists’ efforts throughout campaigns, not just for predicting the outcome. This context conveys that Wang’s advice is not to neglect, or disregard, polling because even though it sometimes fails to predict the winner, it can help improve campaign strategies.

Choice A is incorrect. In this context, to “distort” would mean to give a false or misleading account. Though the text states that many election pollsters have failed in their predictions in presidential elections, it gives no indication that Wang would therefore argue that campaigns shouldn’t react to such polling failures by giving inaccurate accounts of election polling. Instead, the text emphasizes that polls have value beyond predicting winners, suggesting that Wang’s point is that campaigns shouldn’t stop polling entirely. Choice B is incorrect because it wouldn’t make sense to suggest that Wang encourages campaigns not to “enact,” or establish, election polling; the text indicates that election polling is something that already takes place and that has value for campaign strategies even if it sometimes leads to inaccurate predictions of winners, suggesting an argument in favor of continuing to use election polling. Choice D is incorrect. Although the text indicates that many election pollsters have failed in their predictions in presidential elections, there’s no reason to think Wang would say that these failures should lead campaigns *not* to “supplement,” or add to, election polling; it would be reasonable to suggest that campaigns *would* want to consider more than just election polling information if that information may lead to inaccurate predictions. Moreover, the text’s main point is that polls provide some utility even if their predictions may be inaccurate, which suggests that Wang’s recommendations pertain to whether campaigns should or shouldn’t use polling data, not whether polling data should or shouldn’t be supplemented with other kinds of information.

Question Difficulty:
Medium

Question ID d529c1ad

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: d529c1ad

Ezra Pound’s poetry can be hard to _____. it is dense, experimental, and so full of references and allusions that many readers have a difficult time even identifying the poems’ subjects.

Which choice completes the text with the most logical and precise word or phrase?

- A. comprehend
- B. dislike
- C. interrupt
- D. overlook

ID: d529c1ad Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of Ezra Pound’s poetry. In this context, “comprehend” would mean to understand or grasp the meaning of something. The text describes Pound’s poetry as “dense” and “experimental,” with many references that readers may not understand. The text also states that many readers may not even be able to identify a poem’s subject. This context clearly suggests that readers struggle to understand Pound’s poetry as a result of its complexity and obscure references.

Choice B is incorrect. To say that Pound’s poetry is “hard to dislike” would suggest that people generally like it, but the text doesn’t focus on how likeable or enjoyable the poems are; rather, it focuses on how challenging many readers find it to understand them. Choice C is incorrect. To say that Pound’s poetry is “hard to interrupt” would mean that it is hard to stop or break into it while it’s being read or recited, but the text doesn’t discuss any such breaks; instead, the text focuses on the challenge of understanding the content of Pound’s poems. Choice D is incorrect. In this context, “overlook” would mean look past or fail to notice, so to say that Pound’s poetry is “hard to overlook” would mean that it is very likely to be noticed. The text focuses on the difficulty people have in understanding Pound’s poems when reading them, not how noticeable his poetry is in the first place.

Question Difficulty:

Easy

Question ID 7f935017

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 7f935017

The following text is from a 1955 translation of Samuel Beckett’s 1951 novel *Molloy* (translated by the author and Patrick Bowles). In the text, Molloy has arrived at the town ramparts, an elevated walkway atop the city walls.

And having cleared the ramparts I had to confess the sky was clearing, prior to its winding in the other shroud, night. Yes, the great cloud was ravelling, discovering here and there a pale and dying sky, and the sun, already down, was manifest in the livid tongues of fire darting towards the zenith, falling and darting again, ever more pale and languid, and doomed no sooner lit to be extinguished.

©1955 by Grove Press, Inc.

As used in the text, what does the word “manifest” most nearly mean?

- A. Realized
- B. Perceptible
- C. Situated
- D. Dwindling

ID: 7f935017 Answer

Correct Answer:

B

Rationale

Choice B is the best answer because as used in the text, “manifest” most nearly means perceptible or detectable. The text indicates that the sun was “already down,” meaning it was below the horizon and not directly visible. However, the sun’s presence was nonetheless perceptible or manifest in the “tongues of fire” (or beams of light) that still flickered in the darkening sky.

Choice A is incorrect. Although in some contexts “manifest” can mean “realized” or “brought into being,” that is not the context here. Rather, the text is about how the sun’s presence was perceptible or manifest in the “darting” beams of light that could still be seen in the sky. Choice C is incorrect. This choice would suggest that the sun is situated, or located, in the light it emits, which is not supported by the surrounding context. Rather, the text is about how the sun’s presence was perceptible or manifest in the remaining light that could still be seen in the sky. Choice D is incorrect. Although the text is about the decreasing light in the scene at sunset, the text’s use of “manifest” is about how the sun’s presence was nonetheless perceptible or manifest in the “tongues of fire” still visible in the sky as night approached.

Question Difficulty:

Hard

Question ID 0f2933b9

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 0f2933b9

The following text is from William Shakespeare’s circa 1611 play *The Winter’s Tale*. Camillo has been away from his home in Sicily and serves in the court of Polixenes, the king of Bohemia. He has asked Polixenes for permission to return to Sicily.

POLIXENES: I pray thee, good Camillo, be no more importunate. ’Tis a sickness denying thee anything, a death to grant this.

CAMILLO: It is fifteen years since I saw my country. Though I have for the most part been aired abroad, I desire to lay my bones there. Besides, the penitent king, my master, hath sent for me, to whose feeling sorrows I might be some allay—or I o’erween [presume] to think so—which is another spur to my departure.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It establishes Camillo’s hope that Polixenes will be comforted knowing that Camillo isn’t departing at his own discretion.
- B. It suggests that Camillo feels compelled to persuade Polixenes that Camillo’s decision to leave the court is justified.
- C. It conveys Camillo’s recognition that one benefit his presence may afford the king of Sicily is merely speculative.
- D. It bolsters the idea that Camillo’s primary motivation to return home is his concern for the king of Sicily’s well-being in his absence.

ID: 0f2933b9 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. In the text, Camillo explains to Polixenes that he wants to return home after his long absence and that Sicily’s king has summoned him. In the underlined portion, Camillo adds that he also wants to return because he might provide comfort to the king’s sorrows (“to whose feeling sorrows I might be some allay”) but then clarifies that his belief about being able to comfort the king is a presumption—that is, something he thinks is true but can’t be certain of. Thus, the underlined portion indicates that Camillo recognizes that one benefit his presence may offer is merely speculative.

Choice A is incorrect because the underlined portion conveys Camillo’s hope that he might comfort the king of Sicily, which does suggest a personal choice contributing to Camillo’s decision to leave; the idea that Camillo isn’t choosing to leave is established in a different part of the text, when he says “the penitent king, my master, hath sent for me.” Choice B is incorrect because the underlined portion doesn’t suggest Camillo feels compelled to justify his decision to leave. Rather than expressing a need to persuade Polixenes that his departure is warranted, Camillo’s statement simply reveals his awareness that he assumes rather than knows with certainty that his presence will comfort the king of Sicily. Choice D is incorrect because nothing in the text indicates that Camillo’s primary motivation for returning to Sicily is his concern for the king’s well-being; Camillo mentions first that he wants to return home because he has been away for so long, then adds that the king has summoned him and that he hopes his presence will comfort the king. The underlined portion simply conveys Camillo’s awareness that offering comfort is a hope rather than a certainty; it doesn’t suggest that the king’s well-being is his main concern.

Question Difficulty:

Hard

Question ID 29741ebc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 29741ebc

In the past, historians who wanted to examine Frederick Douglass’s diary and other personal papers had to visit the Library of Congress in Washington, DC, to view them on microfilm (film containing scaled-down reproductions of documents). But traveling to the library often added time and costs to research projects. Now, by going to the library’s website, researchers can access digitized versions of Douglass’s papers without physically going anywhere.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It gives information about a famous person.
- B. It explains the meaning of a word.
- C. It describes a debate among historians.
- D. It summarizes an unexpected finding.

ID: 29741ebc Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The underlined portion is a parenthetical phrase directly following the word “microfilm,” and it describes film containing small (“scaled-down”) images; the placement and focus of the portion indicate that it is serving to define the term “microfilm.”

Choice A is incorrect. Although the text is about accessing the writings of a famous historical figure (Douglass), the underlined portion doesn’t give information about Douglass or any other person. Instead, it explains what microfilms are. Choice C is incorrect because the text never describes any kind of debate or disagreement; it simply describes a change in how researchers can access historical documents, with the underlined portion defining an important term. Choice D is incorrect because the text never makes any mention of a particular finding, unexpected or otherwise; it simply describes a change in how researchers do some of their work, with the underlined portion defining an important term.

Easy

Question ID 6e3fdd1a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 6e3fdd1a

During film’s early years, those who worked in the industry had a vested interest in convincing the public to embrace the new medium. As Sumiko Higashi argues, some filmmakers relied on film critics to influence the public’s _____ the world of cinema. Critics who drew similarities between film and traditional art forms, like drama, could help legitimize film as an art form.

Which choice completes the text with the most logical and precise word or phrase?

- A. reproduction of
- B. contribution to
- C. application to
- D. perception of

ID: 6e3fdd1a Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of the early years of film. In this context, “perception of” means understanding of or view of. The text states that people in the film industry had a personal stake (“a vested interest”) in getting the public to embrace film when the medium was new and indicates that some film critics helped legitimize film as an art form—that is, that they helped to make film something people accepted as a type of art. This context conveys that it was the critics’ ability to influence the public’s view of the world of cinema that some early filmmakers relied on.

Choice A is incorrect because in this context, “reproduction of” would refer to a copy of something or the act of copying something, and it wouldn’t make sense to describe the general public as reproducing the world of cinema, or copying film as an entire art form. Choice B is incorrect. In this context, “contribution to” would refer to playing a significant part in causing something to happen. Although the text indicates that people in the early film industry had reasons to want the public to embrace film, it wouldn’t make sense to suggest that filmmakers relied on film critics to influence how the public contributed to the world of cinema; the text focuses on the public’s view of film once the world of cinema existed (embracing it, regarding it as legitimate art) and doesn’t suggest the general public was responsible for the medium’s existence. Choice C is incorrect because in this context, “application to” would refer to putting something to direct use, and it wouldn’t make sense to say that the general public needed to be used in a practical way in the world of cinema. The text focuses on the importance of the public’s view of film when the medium was new but not on the idea that the public needed to be directly involved in film.

ID: 631a1b64

Since the Hubble Space Telescope was launched into space in 1990, astronauts have needed to complete regular missions to repair the telescope and keep it working smoothly. Researchers hope that robots will soon be able to make these repairs. Employing robots instead of humans to make repairs will be helpful, as _____ astronauts to maintain the telescope can be expensive.

Which choice completes the text with the most logical and precise word or phrase?

- A. straightening
- B. forgetting about
- C. relying on
- D. reducing

ID: 631a1b64 Answer

Correct Answer:
C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of repairing the Hubble Space Telescope. In this context, “relying on” means depending on. The text states that astronauts have regularly had to go on missions to repair the Hubble Space Telescope but that robots might soon be able to make the repairs, which would be helpful because involving astronauts in the process is expensive. It is most reasonable to assume that it is the need to send astronauts on missions that is expensive; thus, the context suggests that employing robots for repairs will be helpful because depending on repeatedly sending humans to space is costly.

Choice A is incorrect. In this context, “straightening” would mean physically aligning or removing curves and bends. It’s not clear how astronauts would be physically straightened to maintain the telescope or why that would be expensive. Choice B is incorrect because the text suggests that it is the ongoing involvement of astronauts—the need to send them to space regularly—that is expensive. Nothing in the text indicates that astronauts have been forgotten about or that forgetting about them would be expensive. Choice D is incorrect. In this context, “reducing” would most likely mean lowering in status, and nothing in the text suggests that astronauts are diminished in any way by repairing the telescope (indeed, they have regularly done repairs for years). Further, it isn’t clear how a decrease in status would be expensive.

Question Difficulty:
Easy

Question ID 271a5017

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 271a5017

The following text is adapted from Akwaeke Emezi’s 2019 novel *Pet*. Jam is a teenager who lives with her father, Aloe, and her mother, Bitter, who is a painter.

Bitter finished the painting in the dark morning of a day—it was well past midnight when Jam heard the studio door creak open. She stared into the velvet black of her room and listened to her mother’s footsteps walking in her [mother] and Aloe’s bedroom. There was a weight thrumming through the floorboards in a low song, and that was how Jam knew the painting was done. Bitter’s feet were singing the news.

©2019 by Akwaeke Emezi

Which choice best states the function of the underlined sentence in the text as a whole?

- A. It indicates that Jam is more interested in music than in art.
- B. It adds to the idea that Bitter’s footsteps reveal something to Jam.
- C. It indicates that Bitter always sings when working on a painting.
- D. It describes Aloe’s reaction upon seeing the painting for the first time.

ID: 271a5017 Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The text establishes that Jam hears Bitter’s studio door open early in the morning, when it is still dark. Jam then listens to her mother’s footsteps, which seem to create a song that runs through the floorboards. The text indicates that the sound of Bitter’s footsteps convey to Jam that Bitter is done painting. The underlined sentence then builds on this idea, stating explicitly that Bitter’s feet sing the news of her completion of a painting. Thus, the sentence stating that “Bitter’s feet were singing the news” further emphasizes that Bitter’s footsteps themselves reveal information to Jam.

Choice A is incorrect because the text provides no evidence that Jam prefers music to art. While the underlined sentence uses musical imagery to describe the vibrations Jam feels, this is figurative language that is describing the footsteps’ vibrations; it isn’t an indication of Jam’s personal interests. Choice C is incorrect because the text doesn’t suggest that Bitter herself sings while working on paintings. The references to singing in the text are figurative descriptions of how Bitter’s footsteps sound or feel to Jam, not literal statements about Bitter singing. Choice D is incorrect because the underlined sentence only describes Jam’s perception of her mother’s footsteps. It doesn’t provide any details about Aloe or his reaction to the painting; in fact, the text doesn’t mention Aloe seeing the painting at all.

Question Difficulty:
Easy

Question ID 592f94c2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 592f94c2

Text 1

Good art often challenges and disrupts social and aesthetic norms, but the creation of public art—paintings, sculptures, and performance pieces displayed in nonmuseum or nontheatrical public settings—typically requires broad agreement among artists, civic officials, and community members about the works’ message and artistic goals. Public art that fails to appease everyone by being sufficiently aesthetically and conceptually bland almost inevitably provokes backlash.

Text 2

Public art is commonly displayed in spaces intended for purposes other than meaningful aesthetic engagement. Some critics of public art therefore note that norm-defying pieces that aren’t effectively integrated within their surroundings in a manner that primes passersby to appreciate the pieces’ merits (as is often the case) tend to be regarded more unfavorably than similarly provocative art encountered in museums is.

Based on the texts, how would the critics mentioned in Text 2 most likely respond to the underlined claim in Text 1?

- A. By arguing that the reason members of the general public might disagree about a public artwork’s merits is unrelated to the unconventionality of its appearance and ideas
- B. By agreeing with the idea that only works of art that are universally appealing are suitable for displaying in public spaces
- C. By disputing the notion that civic leaders and community members are easily placated by art that is intended mainly to reinforce social norms
- D. By contending that the kinds of reactions controversial public artworks often receive aren’t exclusively the result of attributes inherent in the works themselves

ID: 592f94c2 Answer

Correct Answer:
D

Rationale

Choice D is the best answer because the critics mentioned in Text 2 would argue that negative reactions to controversial public art are not solely the result of the nature of the art itself. The claim in Text 1 suggests that public artworks tend to provoke backlash when they are not “aesthetically and conceptually bland.” This implies that the content of public art alone can cause backlash. However, the critics in Text 2 offer a more nuanced explanation. They argue that norm-defying pieces of public art that are not “effectively integrated within their surroundings” are more likely to be judged harshly by the public. They also imply that a museum provides a context that prepares viewers to expect challenging art, while public environments that serve other purposes often do not. This indicates that the critics in Text 2 would contend that factors beyond the attributes of the art, like environment and presentation, play a significant role in how public art is received.

Choice A is incorrect because the critics in Text 2 do not argue that unconventionality is unrelated to public disagreement about a public artwork’s merits. Rather, they acknowledge that norm-defying pieces do face unfavorable reactions, but they attribute such reactions to contextual factors like poor integration with the environment rather than dismissing the role of unconventionality entirely. Choice B is incorrect because the critics in Text 2 do not advocate for restricting public art to universally appealing works. Instead, they argue that better integration with the surroundings and situating the work in appropriate contexts could help norm-defying art be better received by passersby. Choice C is incorrect because the critics in Text 2 do not address whether civic leaders and community members are easily satisfied by norm-reinforcing art. The critics in Text 2 instead argue that installation

and integration with the surrounding environment factor into how norm-defying art is received by the general public, rather than disputing how people respond to conventional art.

Question Difficulty:

Hard

Question ID 1695391a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 1695391a

The following text is from Alice Kaplan’s 1993 memoir *French Lessons*.

When I started to talk on my own, I couldn’t be stopped. When I was in first grade, my sister’s friends could hardly stand to ride to school with me in the car. I was loud and unrelenting.

©1993 by The University of Chicago

As used in the text, what does the author most nearly mean by “I couldn’t be stopped”?

- A. She had a hard time sitting still.
- B. She often changed her mind.
- C. She was well liked as a child.
- D. She seemed to talk all the time.

ID: 1695391a Answer

Correct Answer:

D

Rationale

Choice D is the best answer because as used in the text, “I couldn’t be stopped” most nearly means the author seemed to talk all the time. The text establishes that the author is discussing her early speaking habits, stating, “When I started to talk on my own, I couldn’t be stopped.” The following sentences provide context that clarifies the significance of this statement: her sister’s friends “could hardly stand to ride to school” with the author because she “was loud and unrelenting.” This suggests that once the author began speaking, she talked all the time—to the point of annoying others.

Choice A is incorrect because although the phrase “I couldn’t be stopped” could potentially refer to physical movement, the context clearly establishes that the author is discussing her talking habits, not her inability to sit still. The text specifically mentions that she “was loud and unrelenting” and that her sister’s friends disliked riding in the car with her, suggesting that the issue was excessive talking, not physical restlessness. Choice B is incorrect because nothing in the text suggests that the author was fickle or frequently changed her mind. In this context, the phrase “I couldn’t be stopped” refers to the author’s persistent talking, as signaled by her characterization as “loud and unrelenting.” Choice C is incorrect because the text doesn’t indicate that the author was popular or well liked as a child. In fact, it suggests the opposite by stating that her sister’s friends “could hardly stand” to ride in the car with her. Because of her excessive talking, in other words, people found the author annoying as a child.

Question Difficulty:

Easy

Question ID 995358b4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 995358b4

In a 2022 study, Nicolás M. Morato and colleagues attempted to resolve a long-standing paradox: although water is critical to most reactions that enable life, during the earliest stages of Earth’s history—when most of the planet’s surface was covered by oceans—the presence of water likely _____ the formation of proteins and other biomolecules that are found in all living organisms.

Which choice completes the text with the most logical and precise word or phrase?

- A. reflected
- B. hampered
- C. imitated
- D. exploited

ID: 995358b4 Answer

Correct Answer:
B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of a scientific paradox regarding water and life during Earth’s early history. In this context, “hampered” means hindered or impeded. The text discusses a paradox, or a situation that seems to contradict itself, and indicates that one half of the paradox is that the presence of water is necessary to support most biochemical reactions that enable life. The contradictory idea, then, would be a case of the presence of water not supporting such reactions; this context suggests that the other half of the paradox is that when oceans covered most of the planet, the water likely hindered or impeded a biochemical process (the formation of biomolecules) that is important for all living organisms.

Choice A is incorrect. In this context, “reflected” would mean showed or gave an indication. The text focuses on a paradox, or a seemingly self-contradictory situation, having to do with the role of water in supporting life; since the first part of the paradox has to do with water usually being essential for enabling life, the second part of the paradox should have to do with water having a negative effect on life, and water being an indication of a biomolecular process important for life wouldn’t be a negative thing. Choice C is incorrect. In this context, “imitated” would mean mimicked or copied, and it isn’t clear what it would mean to say that water being present on early Earth’s surface somehow copied the creation of biomolecules in living organisms. Choice D is incorrect. In this context, “exploited” would mean used or took advantage of, and it isn’t clear what it would mean to say that the presence of water—the fact of water being present—on early Earth’s surface somehow took advantage of a biomolecular process occurring in living organisms.

Question Difficulty:
Medium

Question ID 70612a79

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 70612a79

Following the eradication of the gray wolf in Yellowstone National Park in 1926, the population of elk—a primary prey of the gray wolf—exceeded a healthy size for the park’s ecosystem. Elk overpopulation led to overgrazing of areas that a multitude of other animals relied on for food and shelter. As scientists began to see how essential the gray wolf was to the Yellowstone food chain, ecological restoration strategies were employed to reintroduce the gray wolf to the park in 1996. The rebound effect in the park’s natural ecosystem was noticed almost immediately.

Which choice best describes the overall structure of the text?

- A. It summarizes a problem that developed in Yellowstone National Park in the 1920s and then offers potential solutions to that problem.
- B. It mentions the elimination of the gray wolf from Yellowstone National Park and then explains why the wolf was eventually restored to the park.
- C. It presents a claim about the health of the Yellowstone National Park gray wolf population and then gives specific examples to support that claim.
- D. It explains why Yellowstone National Park allowed the eradication of the gray wolf and then discusses the consequences of reintroducing the wolf to the park.

ID: 70612a79 Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by stating that the gray wolf was eradicated from Yellowstone National Park in 1926. It then explains the consequences of this elimination—namely that the elk population grew too large and overgrazing occurred, negatively affecting other animals in the area. The text then states that once scientists realized the importance of the gray wolf to the Yellowstone food chain, they undertook efforts leading to the wolves’ reintroduction to the park in 1996. Thus, the structure of the text can be accurately described as mentioning the elimination of the gray wolf from Yellowstone and then explaining why the wolf was later restored to the park.

Choice A is incorrect. While the text does summarize a problem associated with an event in the 1920s (the eradication of gray wolves from Yellowstone in 1926), the problems discussed arose after that event—namely, the subsequent elk overpopulation, resultant overgrazing, and then further impacts to other animals in Yellowstone. Furthermore, the text doesn’t present multiple potential solutions. Instead, it describes one solution that was actually implemented: the reintroduction of gray wolves in 1996. Choice C is incorrect because the text doesn’t make a claim about the health of the gray wolf population apart from pointing out that the wolves had been eradicated from, and then subsequently restored to, Yellowstone. Instead, the text focuses on outcomes associated with the gray wolf’s eradication and reintroduction. Choice D is incorrect. Though the text does mention that the ecosystem of Yellowstone rebounded after the gray wolf was reintroduced in 1996, the text never explains why the park allowed the wolves to be eradicated in 1926. It simply states that this eradication occurred without elaborating on the decision-making process behind it.

Question Difficulty:

Easy

Question ID a086c2cb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: a086c2cb

Built in the 1970s, Raccoon Mountain is a pumped-storage hydropower facility (a “water-battery”) located in the United States along the Tennessee River. When energy demand is low, excess power from the regional electric utility’s nuclear plants is used to pump water (from a lower reservoir filled from the Tennessee River) up a shaft to the summit lake, where the water is stored as gravitational potential energy. When energy demand peaks, the water drains down from the summit lake, spinning turbines and generating upward of 1,700 megawatts of power—enough to power one million homes for twenty hours.

Which choice best states the main purpose of the text?

- A. To point out the differences between two methods of energy generation
- B. To explain the basics of how a specific energy technology works
- C. To encourage regional electric utilities to build energy storage facilities
- D. To discuss the benefits of a new energy technology

ID: a086c2cb Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to explain the basics of how a specific energy technology works. The text introduces Raccoon Mountain as a pumped-storage hydropower facility built in the 1970s and then explains how it operates: during periods of low demand, excess power pumps water up to a lake at the mountain’s summit, and when demand for energy peaks, the water flows back down, spinning turbines along the way to generate electricity. The text provides some additional details, like the name of the water source, but the overall focus is on explaining the basics of how pumped-storage hydropower works.

Choice A is incorrect because the text focuses on one method of energy generation—pumped-water hydropower—and briefly mentions another type of energy generation (nuclear plants) only to identify it as a source of power for the pumping process. The text never makes any comparison between the two methods. Choice C is incorrect because the text simply gives a factual description of how Raccoon Mountain, a pumped-storage hydropower facility, operates; it never suggests that more energy storage facilities should be built, whether by regional utilities or by any other entity. Choice D is incorrect because the text doesn’t present pumped-storage hydropower as a new technology; it indicates that Raccoon Mountain was built in the 1970s, meaning that, rather than being new, this facility is approximately 50 years old.

Question Difficulty:

Easy

Question ID a20b7511

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: a20b7511

Scholars long thought that the initial spread of silk beyond China occurred in the second century CE, but this view has been _____ by new archaeological evidence from South Asia that reveals that the people of the Indus Civilization made use of silk at least 1,000 years earlier.

Which choice completes the text with the most logical and precise word or phrase?

- A. investigated
- B. misinterpreted
- C. anticipated
- D. contradicted

ID: a20b7511 Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of the initial spread of silk beyond China. In this context, “contradicted” means opposed or challenged. The text indicates that new archaeological evidence about silk use in South Asia has done something to a long-held thought about the initial spread of silk. According to the text, the new evidence reveals that people used silk in South Asia 1,000 years before the second century CE, which directly challenges the previous belief that silk first spread beyond China in the second century CE.

Choice A is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn’t make sense to suggest that the finding could have “investigated,” or examined, a belief; evidence can’t examine anything. Choice B is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn’t make sense to suggest that the finding could have “misinterpreted,” or incorrectly understood, a belief; evidence can’t try to understand anything. Choice C is incorrect. In this context, “anticipated” would mean expected or predicted. The text indicates that a new archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and a new finding can’t predict a belief that is already established.

Question Difficulty:

Easy

Question ID bce4d106

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: bce4d106

Archaeologists have identified a plethora of beads fashioned from *Tritia gibbosula* shells in many Middle Stone Age (MSA) sites across western North Africa, including El Mnasra Cave, Morocco. In a 2021 paper, El Mehdi Sehasseh et al. attribute these artifacts’ apparent _____ to the evolution and propagation of symbolic behavior (e.g., use of personal ornaments) in humans and the widespread availability of *T. gibbosula* during the MSA.

Which choice completes the text with the most logical and precise word or phrase?

- A. heterogeneity
- B. ubiquity
- C. expediency
- D. fecundity

ID: bce4d106 Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of beads found in Middle Stone Age sites. In this context, “ubiquity” means widespread presence or commonness. The text states that archaeologists have encountered “a plethora,” or an abundance, of beads made from *Tritia gibbosula* shells “in many Middle Stone Age (MSA) sites across western North Africa.” In this context, the abundance of beads therefore suggests their ubiquity.

Choice A is incorrect because in this context, “heterogeneity” would mean variety or diversity among the beads. The text doesn’t suggest that the beads varied significantly from one another; rather, it focuses on their widespread presence across multiple sites. Moreover, the text mentions that all the beads were “fashioned from *Tritia gibbosula* shells,” suggesting consistency rather than heterogeneity. Choice C is incorrect because the text doesn’t emphasize the beads’ “expediency,” or convenience or practicality. The text doesn’t support the idea of convenience (there’s no indication, for example, that the beads were easy to use or make) but rather focuses on the beads’ abundant presence at MSA sites. Choice D is incorrect. While “fecundity” can suggest abundant production, it specifically refers to fertility, and the text doesn’t connect the beads to this theme. Instead, the text attributes their widespread presence to the development of symbolic behavior in humans and the natural availability of *Tritia gibbosula* during the MSA.

Question Difficulty:

Hard

Question ID 5e4e082c

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 5e4e082c

Text 1

Chemically analyzing bulk rock-core samples from Australia’s Mount McRae Shale, Ariel Anbar et al. found a transient but significant increase in molybdenum (Mo) at a point corresponding to roughly 2.5 billion years ago (Ga). On Earth, Mo is released mainly through oxidative weathering of minerals; Anbar et al. therefore concluded that atmospheric oxygen briefly increased 2.5 Ga, then returned to its earlier negligible level.

Text 2

Sarah Slotznick et al. reexamined the Mount McRae Shale core. Since chemically analyzing bulk samples can occlude contextual details, Slotznick et al. also employed high-resolution microscopy, which revealed volcanic debris—a known Mo host—around 2.5 Ga and microfractures in the surrounding matrix. The researchers assert that fluid could have reached the debris through the microfractures and initiated oxidative weathering long after debris deposition.

Based on the texts, Anbar et al. (Text 1) and Slotznick et al. (Text 2) would most likely disagree about the answer to which question about the portion of the Mount McRae Shale rock-core corresponding to 2.5 Ga?

- A.

Does the increase in Mo in that portion suggest that atmospheric oxygen levels were not negligible before 2.5 Ga?
- B.

Is the increase in Mo in that portion indicative of an increase in atmospheric oxygen dating to the same time?
- C.

Is the increase in Mo in that portion attributable to oxidative weathering of the material found in that portion?
- D.

Did chemically analyzing bulk samples lead to a false impression that there is an increase in Mo in that portion?

ID: 5e4e082c Answer

Correct Answer:

B

Rationale

Choice B is the best answer because Anbar et al. and Slotznick et al. would most likely disagree about whether the molybdenum (Mo) increase indicates atmospheric oxygen levels specifically at 2.5 Ga. Anbar et al. conclude that the Mo increase they found “at a point corresponding to roughly 2.5 billion years ago” means that “atmospheric oxygen briefly increased 2.5 Ga, then returned to its earlier negligible level,” directly linking the timing of the Mo increase to contemporaneous atmospheric oxygen levels. In contrast, Slotznick et al. discovered volcanic debris and microfractures in the rock core and “assert that fluid could have reached the debris through the microfractures and initiated oxidative weathering long after debris deposition.” If, as Slotznick asserts, the Mo detected at the 2.5 Ga portion could have been deposited there much later through weathering processes, then the Mo increase wouldn’t necessarily indicate atmospheric oxygen levels at 2.5 Ga specifically. Thus, Anbar et al. and Slotznick et al. disagree on whether the increase in Mo in the portion of the rock core corresponding to 2.5 Ga is indicative of an increase in atmospheric oxygen dating to the same time.

Choice A is incorrect because neither research team’s findings directly address atmospheric oxygen levels before 2.5 Ga. Anbar et al. conclude that oxygen “returned to its earlier negligible level” after 2.5 Ga, implying low pre–2.5 Ga levels, while Slotznick et al. focus on explaining the Mo increase through later weathering processes rather than making claims about earlier atmospheric conditions. Choice C is incorrect because both research teams would likely agree that the Mo increase is attributable to oxidative weathering. Anbar et al. state that “Mo is released mainly through oxidative weathering of minerals,” and Slotznick et al. also reference “oxidative weathering” as the process that released Mo from the volcanic debris. Their disagreement concerns the timing of this weathering, not whether oxidative weathering is responsible. Choice D is incorrect because Slotznick et al. don’t

suggest that bulk chemical analysis created a false impression about the presence of increased Mo. They acknowledge that the Mo increase exists but offer a different explanation for its timing and source. They critique bulk analysis for occluding “contextual details” that would require another kind of analysis to uncover, not for producing inaccurate measurements of Mo levels.

SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: edbc6cca

The following text is from Bram Stoker’s 1911 novel *The Lair of the White Worm*. Adam is meeting his great-uncle Richard at a port.

The meeting so auspiciously begun proceeded well. Adam, seeing that the old man was interested in the novelty of the ship, suggested that he should stay the night on board, and that he would himself be ready to start at any hour and go anywhere that the other suggested. This affectionate willingness to fall in with his own plans quite won the old man’s heart. He warmly accepted the invitation, and at once they became not only on terms of affectionate relationship, but almost like old friends.

Which choice best states the main purpose of the text?

- A. It states the reasons why Adam and his great-uncle Richard decide to sleep on the ship rather than finding lodging on land.
- B. It showcases how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard.
- C. It describes why Adam and his great-uncle Richard are excited for their upcoming journey on the ship.
- D. It contrasts great-uncle Richard’s wary first impressions of Adam with his ultimate affection toward him.

ID: edbc6cca Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to showcase how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard. The text begins by stating that the meeting between the two characters is proceeding well and then describes Adam’s thoughtful behavior: noticing his great-uncle’s interest in the ship, Adam suggests staying on board overnight and expresses willingness to accommodate his great-uncle’s schedule and destination preferences. The text goes on to describe the positive effect of Adam’s thoughtfulness and flexibility, indicating that Adam’s “affectionate willingness” to accommodate Richard’s preferences “quite won the old man’s heart.” The text concludes by suggesting that Adam’s ability to anticipate his great-uncle’s wishes and willingness to accommodate them result in the rapid development of affection and intimacy between them, stating that they soon became “almost like old friends.” Therefore, the text’s main purpose is to demonstrate how Adam’s flexibility and consideration strengthened his and his great-uncle’s relationship.

Choice A is incorrect. Although the text explains Adam’s reason for suggesting that Richard spend the night on the ship rather than finding lodging on land (which is that Adam perceives Richard’s interest in the ship), this isn’t the text’s main purpose. Rather, Adam’s suggestion about where to sleep for the night serves as an example of the consideration Adam shows toward Richard, and the text mentions it mainly to explain how an affectionate relationship developed so quickly between them. Moreover, the text only states that Adam encourages Richard to stay on the ship; it doesn’t specify where Adam plans to spend the night. Choice C is incorrect because the text doesn’t describe why Adam and his great-uncle Richard are excited about their journey. While the text mentions that Adam is willing to “start at any hour and go anywhere,” it provides no details about any planned journey, its destination, or even whether they will be continuing by ship or some other mode of transportation, nor does the text mention anything about either character’s feelings of excitement about their plans. We learn only that Adam is accommodating about potential travel plans, not that either character is particularly eager about the journey itself. The text’s main focus is on Adam and Richard’s developing relationship, not on any anticipated travel experiences. Choice D is incorrect because the text doesn’t show a contrast between initial wariness and later affection. On the contrary, the text begins by stating that the meeting between Adam and his great-uncle Richard has begun in an “auspicious,” or promising, manner and is “proceed[ing] well,” suggesting that Richard’s impression is positive from the outset. There’s no indication of any initial suspicion, caution, or reserve on Richard’s part

that later changes to affection. Instead, the text describes a consistently positive interaction that deepens from a good first impression into a stronger, more familiar relationship because of Adam's considerate behavior.

The unique *subak* water management system used to irrigate the rice paddy fields of the Indonesian island of Bali has a rich cultural, philosophical, and historical significance dating back to the ninth century. The many elements of subak—terraces, canals, and water temples—are ____: they are joined together into a single cohesive unit.

Which choice completes the text with the most logical and precise word or phrase?

- A. outmoded
- B. informal
- C. interconnected
- D. optional

ID: bcd924a5 Answer

Correct Answer:

C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of Bali’s *subak* water management system. In this context, “interconnected” would mean joined or linked together. The text describes the various components of the subak system—“terraces, canals, and water temples”—and then states that they are “joined together into a single cohesive unit.” This context indicates that these elements are connected with one another in an integrated system.

Choice A is incorrect because “outmoded” would mean outdated or no longer in use. While the text does indicate that the subak system has “rich cultural, philosophical, and historical significance,” the text doesn’t suggest that the subak system is obsolete or not currently used. Choice B is incorrect because “informal” would suggest that the subak system lacks structure or organization. The text contradicts this by describing a complex system with specific components (“terraces, canals, and water temples”) that are “joined together into a single cohesive unit,” indicating formal organization rather than informality. Choice D is incorrect because “optional” would suggest that the various elements of the subak system are not necessary or required. The text indicates the opposite by stating that these elements are “joined together into a single cohesive unit,” suggesting that each component plays a necessary role in the functioning of the integrated system.

SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 16f2d678

Although the government of the Soviet Union attempted to _____ Georgi Vladimov’s novel *Faithful Ruslan*, copies of the book circulated in secret among readers in several parts of the country.

Which choice completes the text with the most logical and precise word or phrase?

- A. replicate
- B. critique
- C. import
- D. suppress

ID: 16f2d678 Answer

Correct Answer:

D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of Georgi Vladimov’s novel *Faithful Ruslan*. In this context, “suppress” means to prevent something, such as a book, from being accessed by the public. The text indicates that the novel was circulated secretly within the Soviet Union, a stratagem that was necessary because of the government’s efforts to suppress the book, or prevent it from being circulated and read.

Choice A is incorrect because in this context, “replicate” would mean to copy or reproduce a book, and this meaning wouldn’t make sense in the text’s discussion of *Faithful Ruslan*. If the Soviet government had attempted to replicate Vladimov’s novel, there would be no reason for copies to circulate “in secret,” since the government would be actively making more copies available, not restricting access. Choice B is incorrect. Although a repressive government might well “critique” a novel, or evaluate it negatively, simply critiquing one wouldn’t necessarily lead to copies of it circulating “in secret.” Instead, the text suggests that the Soviet government took decisive action against *Faithful Ruslan* that necessitated its underground circulation and did not merely offer criticism of the novel. Choice C is incorrect because “import” means to bring a product, such as a book, into a country from elsewhere. However, the text suggests that copies of *Faithful Ruslan* were already present in the Soviet Union and that the government was trying to restrict their circulation rather than increasing access to the novel by importing copies from another country.

Question ID 93ce86d0

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 93ce86d0

Curious about how people visually perceive objects in their dreams, Stephen LaBerge and team recruited lucid dreamers—people aware that they’re dreaming as it’s happening—for a research study. These participants were reliably able to signal when they had entered a dream state; the team then observed participants’ eye movements as they slept. The smoothness with which participants’ eyes tracked objects in their dreams closely matched how sighted people who are awake visually track objects around them, suggesting to the team that the brain perceives dream objects as the product of something other than pure imagination.

Which choice best states the function of the underlined portion in the text as a whole?

- A. To offer key evidence that undermines LaBerge and team’s initial hypothesis
- B. To show the unexpected result that led LaBerge and team to change the focus of their study
- C. To illustrate an important real-world implication of LaBerge and team’s main finding
- D. To identify a comparable circumstance that helps justify LaBerge and team’s conclusion

ID: 93ce86d0 Answer

Correct Answer:
D

Rationale

Choice D is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The text first establishes that in order to investigate visual perception of objects in dreams, LaBerge and team observed the eye movements of lucid dreamers (people who are aware of their dreaming as it occurs) when these participants signaled that they were in a dream state. The underlined portion then describes a finding that rests on a comparison: the way participants’ eyes tracked objects in dream states was very similar to how sighted people track real objects when awake. Finally, the text states that the team concluded from this finding that objects in dreams are perceived as more than just products of imagination—implying that the team thinks the eye movements are an indication that the brain treats dream objects as more real than imaginary. Thus, the function of the underlined portion is to identify a circumstance that is comparable to one in the study and that helps justify LaBerge and team’s conclusion, presenting the close similarity of visual tracking in wakeful and dreaming scenarios as support for the implicit idea that the brain perceives dream objects not as imaginary but as somewhat or fully real objects.

Choice A is incorrect because the text never presents LaBerge and team’s initial hypothesis, only what question they were interested in studying and what they found. So although the underlined portion does present evidence, that evidence doesn’t serve to undermine any hypothesis in the text. Choice B is incorrect because the text gives no indication that LaBerge and team changed the focus of their study at any point or that the finding described in the underlined portion (or any other finding) was unexpected or surprising. Choice C is incorrect. Rather than illustrating an implication of the main finding by LaBerge and team, the underlined portion only presents the finding itself, stating that the team found that the movements of lucid dreamers’ eyes while dreaming were very similar to those of sighted people visually tracking objects while awake. The next part of the text indicates what the finding implied to the team but still doesn’t offer a real-world example as illustration.

Question Difficulty:
Hard

Question ID dd19befa

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: dd19befa

The familial structure of the black swan (*Cygnus atratus*) shows tremendous _____. breeding pairs with demonstrated success in rearing cygnets (young swans) have been observed to foster those of less successful pairs, and while rearing by female-male pairs is most common, male-male pairs sometimes rear cygnets too, achieving a significantly higher rate of survival to adulthood than female-male pairs.

Which choice completes the text with the most logical and precise word or phrase?

- A. cohesion
- B. elasticity
- C. affection
- D. reciprocity

ID: dd19befa Answer

Correct Answer:

B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of black swan familial structures. In this context, “elasticity” means flexibility or adaptability. The text provides examples of flexible family arrangements among black swans: successful male-female breeding pairs are known to foster other pairs’ cygnets, and while they are less common, male-male pairs also successfully rear cygnets. This context therefore emphasizes the flexibility or elasticity of black swan familial structures, showing how this trait contributes to the success of the species.

Choice A is incorrect. Although close family units may show “cohesion,” which refers to unity or harmony within a group, the text’s focus is on the variety and adaptability of black swan family structures. The examples given—fostering other pairs’ cygnets and forming male-male as well as female-male pairs—highlight flexibility rather than cohesion, emphasizing family structures that vary from the model in which a breeding pair raises its own young. Choice C is incorrect. While “affection,” or fondness, might be present in black swan relationships, the text doesn’t focus on emotional bonds but rather on the structural flexibility of black swan familial arrangements. The examples provided demonstrate adaptable breeding and rearing practices rather than affectionate behaviors. Choice D is incorrect because “reciprocity” would suggest mutual exchange or cooperation between parties. Although the text mentions the fostering of cygnets by different successful breeding pairs, it doesn’t establish that this is based on reciprocal exchanges. The focus is instead on the flexibility of family structures and the effectiveness of these varied structures in rearing young.

Question ID 0afb2ac4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 0afb2ac4

Ancient Inca inhabiting the Andes Mountains used terraces, rows of flattened land with built-in irrigation systems, to grow crops at different altitudes. This method of farming proved to be highly _____, as evidenced by the great number and variety of crops grown at that time.

Which choice completes the text with the most logical and precise word or phrase?

- A. chaotic
- B. uniform
- C. effective
- D. burdensome

ID: 0afb2ac4 Answer

Correct Answer:

C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of the ancient Inca farming method. In this context, “effective” means successful in producing a desired result. The text describes how the Inca used terraces with built-in irrigation systems to grow crops at different altitudes and then indicates that this farming method produced positive results “as evidenced by the great number and variety of crops grown at that time.” The context clearly suggests that the terraced farming approach was highly productive, or effective.

Choice A is incorrect because to describe the Inca farming method as “chaotic” contradicts the text’s description of a systematic approach using deliberately constructed terraces with built-in irrigation systems. Moreover, the “great number and variety of crops” yielded by this method seems unlikely to result from a disorganized, or chaotic, approach. Choice B is incorrect because “uniform” means consistent or the same throughout. It does not make sense in this context to describe a farming method as highly uniform if it produced a “great number and variety of crops.” Moreover, the text indicates that Inca terrace farming was specifically designed to accommodate different crops at different altitudes, highlighting the diversity rather than uniformity of this approach. Choice D is incorrect because the success of the method, “as evidenced by the great number and variety of crops grown,” does not support the claim that the Inca farming method was “burdensome,” or difficult to implement or maintain. In fact, the context clearly emphasizes the advantages, rather than the burdens, of Inca terrace farming.

Question Difficulty:

Easy

Question ID 7b43c0cc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 7b43c0cc

Steiger Butte Drum, a family ensemble from the Klamath Tribes of the Pacific Northwest, collaborated with composer Michael Gordon to create *Natural History*, a work featuring traditional drumming and vocals alongside an orchestra and chorus. Steiger Butte Drum’s participation is _____ to the piece: members not only contributed to its composition but also must be included in all performances.

Which choice completes the text with the most logical and precise word or phrase?

- A. tangential
- B. subsequent
- C. analogous
- D. integral

ID: 7b43c0cc Answer

Correct Answer:
D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of Steiger Butte Drum’s contributions to the musical work *Natural History*. In this context, “integral” means essential or necessary to the whole. The text states that Steiger Butte Drum not only took part in the piece’s creation, collaborating with composer Michael Gordon on it, but also “must be included in all performances.” This context clearly indicates that the ensemble’s participation is essential, or integral, to the piece, both in its creation and its performance.

Choice A is incorrect because in this context, “tangential” would mean peripheral or of little relevance to something. The text emphasizes the importance of Steiger Butte Drum’s involvement in both the composition and performance of *Natural History*, indicating their role is central, not tangential. Choice B is incorrect because in this context, “subsequent” would mean following after or coming later than something else. The text doesn’t establish a temporal sequence where the participation of Steiger Butte Drum followed after the creation of *Natural History*; rather, it indicates that the ensemble was involved with the piece from the beginning, having worked with Michael Gordon during the creation process. Choice C is incorrect because in this context, “analogous” would mean similar or comparable to something else, and the text doesn’t compare Steiger Butte Drum’s participation in the creation and performances of *Natural History* to anything else; instead, it describes the nature and importance of the ensemble’s involvement.

Question Difficulty:

Question ID 3e63fce0

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 3e63fce0

A team of researchers discovered that Matabele ants can identify an infected wound in a member of the colony and then treat the infection by covering the wound with antimicrobial secretions that the ants produce. The team found that the mortality rate for Matabele ants with infected injuries was reduced by 90% with this treatment, and they are hopeful that this discovery could aid in the development of new antibiotics for human use.

Which choice best describes the overall structure of the text?

- A. It summarizes research findings on Matabele ants and then identifies an area for further research.
- B. It introduces a study of Matabele ants and then explains the research methods used in the study.
- C. It describes unique properties of Matabele ants and then speculates on how those properties evolved.
- D. It identifies an issue concerning Matabele ants and then proposes a solution to address the issue.

ID: 3e63fce0 Answer

Correct Answer:
A

Rationale

Choice A is the best answer because it most accurately describes the overall structure of the text. The text first presents what researchers found from studying Matabele ants: the ants can tell when colony members have infected wounds and can largely successfully treat those infections with their antimicrobial secretions. The text then indicates that the findings about the ants could help with the future development of antibiotics for humans. Thus, the text summarizes research findings and then identifies an area for further research.

Choice B is incorrect. Although the text introduces a study about Matabele ants, it never discusses how the researchers did their work or any methods they used to produce their findings. Choice C is incorrect. Although the text does describe properties of Matabele ants—their ability to detect and largely successfully treat infected wounds in colony members—it never addresses evolution or how these properties might have changed. Choice D is incorrect because the text doesn’t present anything about Matabele ants as an issue or problem to be solved. Instead, it discusses beneficial abilities the ants have (detecting and treating infected wounds) and suggests that understanding those abilities might be useful for human medicine.

Question ID b35e2fdc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: b35e2fdc

A casual description of Scherezade García’s 2019 mural *Blame It on the Bean: The Power of Coffee* can make the work seem _____—a painting that is housed in a coffee shop and that depicts three women drinking coffee may not sound particularly ambitious—but in fact the work is a complex, dynamic meditation on gender and the legacy of colonialism that demands serious attention.

Which choice completes the text with the most logical and precise word or phrase?

- A. unassuming
- B. shrewd
- C. incongruous
- D. pretentious

ID: b35e2fdc Answer

Correct Answer:

A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of Scherezade García’s mural *Blame It on the Bean: The Power of Coffee*. In this context, “unassuming” means ordinary or unremarkable. The text draws a contrast between a “casual description” of the mural’s ordinary location (a coffee shop) and subject matter (three women drinking coffee)—details that would make it seem relatively unambitious—and a characterization of the painting as a “dynamic meditation” on gender and colonialism deserving of “serious attention.” This context suggests that the mural has significant depth and complexity, but a superficial description of it might make the mural seem ordinary and unremarkable—that is, unassuming.

Choice B is incorrect because in this context, “shrewd” would mean clever or astute, and there’s nothing in the text to suggest that a casual yet misleading description that only mentions the apparent simplicity of the mural’s location and subject matter would make the mural seem particularly clever or astute. Though it’s possible that the text’s assertion that the mural is a “complex, dynamic meditation” demanding “serious attention” might convey the idea that it’s a particularly clever or astute—that is, shrewd—artwork, the text wouldn’t suggest that a casual description that fails to account for the work’s complexity would likewise characterize the work as shrewd. Choice C is incorrect because in this context, “incongruous” would mean unsuitable for its surroundings or internally inconsistent. The “casual description” presented in the text indicates that the painting is housed in a coffee shop and depicts women drinking coffee, which would imply that the mural may in fact be well suited to its surroundings, not that it’s ill suited to its location. Moreover, none of the details mentioned in this description would suggest that the painting contains internal inconsistencies of any kind. Choice D is incorrect because in this context, “pretentious” would mean expressive of exaggerated importance, which wouldn’t fit the contrast established in the text between a “casual description” of the painting and the work’s deeper themes. Though the text argues that the painting is worthy of “serious attention,” which would suggest its importance, the text doesn’t suggest that the casual description would by contrast imply that the painting’s importance is exaggerated. Rather, by merely mentioning the mural’s relatively ordinary location and subject matter without reference to this complexity, the casual description conveys that the painting is more unassuming and understated than it actually is, not that it expresses an exaggerated self-importance.

Question Difficulty:

Hard

Question ID d3b7d7a3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: d3b7d7a3

Many historical accounts of the 1930s focus on the widespread movement of people from dust bowl–ravaged Great Plains states to faraway California. However, a 2016 study of 1940 census data complicates this popular narrative; _____ researchers determined, migrants in states hardest hit by prolonged droughts and dust storms—Colorado, Kansas, Oklahoma, and Texas—merely relocated within the region.

Which choice completes the text with the most logical transition?

- A. for this reason,
- B. more often,
- C. additionally,
- D. nevertheless,

ID: d3b7d7a3 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. “More often” logically signals that the historical outcome in this clause—dust bowl migrants’ relocation within the Great Plains region—was more common than the movement to California described in many historical accounts.

Choice A is incorrect because “for this reason” illogically signals that the historical outcome in this clause was caused by either the narrative about widespread movement to California or the 2016 study’s complication of that narrative. Instead, dust bowl migrants’ regional relocation was found to be more common than the movement to California described in many historical accounts. Choice C is incorrect because “additionally” illogically signals that the historical outcome in this clause merely adds to either the narrative about widespread movement to California or the 2016 study’s complication of that narrative. Instead, dust bowl migrants’ regional relocation was found to be more common than the movement to California described in many historical accounts. Choice D is incorrect because “nevertheless” illogically signals that the historical outcome in this clause is true despite either the narrative about widespread movement to California or the 2016 study’s complication of that narrative. While the findings about dust bowl migrants’ regional relocation did challenge the previous narrative, they did not challenge the study’s findings, and this choice creates a confusing ambiguity. Instead, dust bowl migrants’ regional relocation was found to be more common than the movement to California described in many historical accounts.

Question Difficulty:
Hard

Question ID be44fea0

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: be44fea0

While studying jorō spiders, a large species originally from East Asia, University of Georgia researchers wondered if the spiders’ rapid spread throughout the southeastern US was a result of aggressive behavior. _____ they discovered that jorō spiders are gentle giants who react to even minor disturbances by “freezing” in place for an hour or more.

Which choice completes the text with the most logical transition?

- A. Therefore,
- B. Instead,
- C. For example,
- D. In other words,

ID: be44fea0 Answer

Correct Answer:

B

Rationale

Choice B is the best answer. “Instead” logically signals that the information about the researchers’ discovery in this sentence—that jorō spiders are gentle giants who “freeze” in place when disturbed—contradicts their initial hypothesis about the spiders’ aggressiveness described in the previous sentence.

Choice A is incorrect because “therefore” illogically signals that the discovery about jorō spiders’ gentleness is a result of the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice C is incorrect because “for example” illogically signals that the discovery about jorō spiders’ gentleness exemplifies the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice D is incorrect because “in other words” illogically signals that the discovery about jorō spiders’ gentleness is merely restating or rephrasing the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis.

Question Difficulty:

Medium

Question ID 1d79a59d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: 1d79a59d

While researching a topic, a student has taken the following notes:

- Leaders of the Province of Guatemala proclaimed independence for Central America from the Spanish Empire on September 15, 1821.
- The accompanying Declaration of Independence was written by Honduran scholar and politician José Cecilio del Valle.
- The 1812 Spanish Constitution had provided some degree of independence for Central America, but it was repealed by the Spanish king in 1814.
- Valle, a loyal advisor to the Spanish Empire’s administrators in Central America, had long opposed independence.
- He changed his mind after Colonel Rafael del Riego’s 1820 revolt, which demanded the return of rights lost in 1814.

The student wants to place the 1821 Declaration of Independence in the context of Valle’s changing political beliefs. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Colonel Riego’s revolt was the inspiration that Valle, a long-standing opponent of Central American independence, needed to change his political beliefs.
- B. Long an opponent of Central American independence, Valle changed his mind after an 1820 revolt and wrote the 1821 declaration.
- C. A change in Valle’s political beliefs that occurred when the Spanish king repealed the 1812 constitution led to Valle writing Central America’s Declaration of Independence.
- D. The writing of Central America’s Declaration of Independence may not have happened were it not for Colonel Riego’s 1820 revolt.

ID: 1d79a59d Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The sentence places the Declaration of Independence in the context of Valle’s changing political beliefs, noting that Valle was long an opponent of Central American independence but changed his mind after an 1820 revolt and then wrote the Declaration of Independence in 1821.

Choice A is incorrect. The sentence states that Valle’s political beliefs changed after Riego’s revolt but doesn’t indicate how these changed beliefs provide context for the 1821 Declaration of Independence. Choice C is incorrect because it misrepresents information from the notes. Valle’s political beliefs changed after Riego’s 1820 revolt, not when the Spanish king repealed the 1812 constitution. Choice D is incorrect. While the sentence indicates a relationship between Colonel Riego’s 1820 revolt and Central America’s Declaration of Independence, it doesn’t mention Valle’s changing political beliefs.

Question Difficulty:
Hard

Question ID e6b1e12c

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: e6b1e12c

Long thought to be sessile (immobile), adult *Chelonibia testudinaria*, barnacles that adhere to sea turtle shells, have been observed to shift slightly in position over time—a phenomenon that has been attributed to the barnacles’ passive displacement by water currents. _____ a research team found that adult *C. testudinaria* moved toward the heads of their sea turtle hosts and thus against the prevailing water flow, behavior consistent with self-initiated locomotion.

Which choice completes the text with the most logical transition?

- A. Contrary to this phenomenon,
- B. Undermining this explanation,
- C. Drawing a similar conclusion,
- D. Confirming this hypothesis,

ID: e6b1e12c Answer

Correct Answer:

B

Rationale

Choice B is the best answer. “Undermining this explanation” logically signals that the information in this sentence—that adult *Chelonibia testudinaria* showed behavior consistent with self-initiated locomotion—undermines or weakens the previous explanation that barnacle movement was a result of passive displacement by water currents.

Choice A is incorrect because “contrary to this phenomenon” illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion opposes the previous information about barnacles shifting slightly in position over time. Instead, the sentence undermines or weakens the previous claim about passive displacement. That is, the sentence doesn’t oppose the fact that the barnacles shifted position: it challenges the previous sentence’s explanation for the movement. Choice C is incorrect because “drawing a similar conclusion” illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion is similar to the previous conclusion that barnacle movement is the result of passive displacement. Instead, the sentence undermines or weakens the previous sentence’s explanation for how the barnacles moved. Choice D is incorrect because “confirming this hypothesis” illogically signals that the information in this sentence about barnacles exhibiting behavior consistent with self-initiated locomotion confirms the hypothesis in the previous sentence that the barnacle movement was the result of passive displacement. Instead, the sentence undermines or weakens the previous sentence’s explanation for how the barnacles moved.

Question Difficulty:

Hard

Question ID b88dad9d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: b88dad9d

Al-Andalus, the historical region of the Iberian Peninsula that includes most of modern-day Spain, was ruled by various Arabic-speaking Muslim states between the eighth and fifteenth centuries. _____ many Arabic words, such as “alacrán”—meaning “scorpion”—made their way into the Spanish language.

Which choice completes the text with the most logical transition?

- A. For example,
- B. Instead,
- C. Specifically,
- D. Consequently,

ID: b88dad9d Answer

Correct Answer:

D

Rationale

Choice D is the best answer. “Consequently” logically signals that the information in this sentence—that many Arabic words entered the Spanish language—is a result or consequence of the previous information about Arabic-speaking Muslim states ruling Al-Andalus for centuries.

Choice A is incorrect because “for example” illogically signals that the information about Arabic words entering Spanish exemplifies the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. Instead, Arabic words entering Spanish is a consequence of that history. Choice B is incorrect because “instead” illogically signals that the information about Arabic words entering Spanish provides an alternative to the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. The information about Arabic words entering Spanish is a consequence of that history. Choice C is incorrect because “specifically” illogically signals that the information about Arabic words entering Spanish provides specific details elaborating on the Arabic-speaking history of Al-Andalus mentioned in the previous sentence. Instead, Arabic words entering Spanish is a consequence of that history.

Question Difficulty:

SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: 080a7b51

Imagine a magazine that a reader has thrown away. This magazine is post-consumer waste, as it became waste after reaching the consumer. _____ the paper scraps left over from printing the magazine are pre-consumer waste, as they became waste before reaching the consumer.

Which choice completes the text with the most logical transition?

- A. By contrast,
- B. For example,
- C. As a result,
- D. Specifically,

ID: 080a7b51 Answer

Correct Answer:

A

Rationale

Choice A is the best answer. “By contrast” logically signals that the information in this sentence—that paper scraps left over from printing a magazine are pre-consumer waste—contrasts with the previous information about magazines being post-consumer waste.

Choice B is incorrect because “for example” illogically signals that the information in this sentence exemplifies the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information. Choice C is incorrect because “as a result” illogically signals that the information in this sentence is a result or consequence of the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information. Choice D is incorrect because “specifically” illogically signals that the information in this sentence provides specific, precise details elaborating on the previous information about post-consumer waste. Instead, the paper scraps being pre-consumer waste contrasts with the previous information.

Question Difficulty:

Medium

Question ID a1955620

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: a1955620

While researching a topic, a student has taken the following notes:

- Edmonia Lewis (1844–1907) was an African American and Mississauga Ojibwe sculptor.
- *Forever Free* (1867) is a marble sculpture by Lewis.
- It depicts a male figure and a female figure gazing upward.
- It commemorates the 1863 Emancipation Proclamation.
- The phrase “forever free” from the text of the Emancipation Proclamation is inscribed on the sculpture’s base.
- Art historian Kirsten Buick describes the sculpture as a “celebration of liberty.”

The student wants to explain the sculpture’s specific historical context. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. According to art historian Kirsten Buick, *Forever Free*, which depicts a male figure and a female figure gazing upward, is a “celebration of liberty.”
- B. The base of Edmonia Lewis’s 1867 marble sculpture is inscribed with a historically significant phrase: “forever free.”
- C. Completed in 1867, Lewis’s sculpture *Forever Free* commemorates the Emancipation Proclamation, which had been issued four years previously.
- D. *Forever Free* (1867) is a marble sculpture by Edmonia Lewis, an African American and Mississauga Ojibwe sculptor who lived from 1844 to 1907.

ID: a1955620 Answer

Correct Answer:
C

Rationale

Choice C is the best answer. The sentence explains the specific historical context of Lewis’s sculpture, noting that it commemorates the Emancipation Proclamation, which was issued four years before the sculpture was completed in 1867.

Choice A is incorrect. The sentence quotes an art historian’s general interpretation of the sculpture’s meaning; it doesn’t explain the sculpture’s specific historical context. Choice B is incorrect. While the sentence mentions a historically significant phrase on the sculpture’s base, it doesn’t explain the specific historical context of the phrase or the sculpture. Choice D is incorrect. The sentence provides biographical information about Lewis; it doesn’t explain the specific historical context of the sculpture.

Question Difficulty:
Medium

Question ID f5149550

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: f5149550

A staunch supporter of women’s voting rights, Wilhelmina Kekelaokalaninui Widemann Dowsett sought to coordinate the efforts of suffragists in her native Hawai’i. _____ in 1912, she founded the National Women’s Equal Suffrage Association of Hawai’i, an organization that lobbied for women’s voting rights in the US territory.

Which choice completes the text with the most logical transition?

- A. In other words,
- B. Conversely,
- C. To that end,
- D. Alternatively,

ID: f5149550 Answer

Correct Answer:

C

Rationale

Choice C is the best answer. “To that end” logically signals that the information in this sentence—that Dowsett founded the National Women’s Equal Suffrage Association of Hawai’i—describes an action Dowsett took to achieve the goal stated in the previous sentence: to coordinate the efforts of suffragists in Hawai’i.

Choice A is incorrect because “in other words” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association is a paraphrase or restatement of the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice B is incorrect because “conversely” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association contrasts with the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice D is incorrect because “alternatively” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association presents an alternative to her seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal.

Hard

Question ID a266d876

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: a266d876

Upper-atmospheric jets—phenomena whereby electrical discharges cause narrow cones of blue light to briefly burst upward from the tops of thunderclouds—have been observed reaching the ionosphere. The extreme altitudes involved (the ionosphere begins about 80 km above Earth) mark these gigantic jets as outliers; _____ the majority of jets reach heights of only 20 to 50 km.

Which choice completes the text with the most logical transition?

- A. nevertheless,
- B. consequently,
- C. indeed,
- D. in addition,

ID: a266d876 Answer

Correct Answer:

C

Rationale

Choice C is the best answer. “Indeed” logically signals that the information that follows—that the majority of jets reach heights of only 20 to 50 km—offers additional emphasis in support of the previous claim that jets reaching the ionosphere (about 80 km above Earth) are outliers.

Choice A is incorrect because “nevertheless” illogically signals that the information about most jets reaching heights of only 20 to 50 km contrasts with the previous claim that jets reaching the ionosphere are outliers. Instead, it provides additional emphasis in support of that claim. Choice B is incorrect because “consequently” illogically signals that the information about most jets reaching heights of only 20 to 50 km is a consequence, or result, of some jets being outliers. Instead, it offers additional emphasis in support of the claim that jets reaching the ionosphere are outliers. Choice D is incorrect because “in addition” illogically signals that the information about most jets reaching heights of only 20 to 50 km merely adds to the previous claim that jets reaching the ionosphere are considered outliers. Instead, it provides additional emphasis in support of that claim.

Question Difficulty:

Hard

Question ID 459df2ba

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: 459df2ba

While researching a topic, a student has taken the following notes:

- Modularity of mind is the notion that the mind is at least partly composed of innate neural structures (modules) that perform fast, necessary tasks.
- 1983: cognitive scientist Jerry A. Fodor hypothesized that low-level cognitive systems (e.g., perception, language) are modular.
- In Fodorian modularity, high-level systems (e.g., reasoning) are not modular.
- 2003: cognitive scientist Peter Carruthers proposed the massive modularity hypothesis (MMH).
- MMH expands modularity to include all cognitive systems.

The student wants to compare Fodor’s hypothesis with Carruthers’s. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. In considering some but not all cognitive systems modular, Fodorian modularity is not as expansive in its definition of modularity as MMH is.
- B. Following Fodor’s 1983 hypothesis, Carruthers proposed that modularity of mind includes all cognitive systems.
- C. The hypotheses of Fodor and Carruthers differ in whether they consider low-level cognitive systems, such as perception and language, modular.
- D. In 2003, Carruthers proposed the massive modularity hypothesis, disagreeing with Fodor’s earlier hypothesis that the mind is composed of innate neural structures.

ID: 459df2ba Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The sentence compares Fodor’s hypothesis with Carruthers’s, noting that because Fodorian modularity considers some but not all cognitive systems modular, it is not as expansive in its definition of modularity as Carruthers’s MMH, which includes all cognitive systems.

Choice B is incorrect. The sentence describes Carruthers’s hypothesis—that modularity of mind includes all cognitive systems—but indicates only that this hypothesis followed Fodor’s 1983 hypothesis rather than making a comparison between the hypotheses. Choice C is incorrect. The sentence misrepresents a difference between Fodor’s and Carruthers’s hypotheses. According to the information in the notes, both Fodor and Carruthers consider low-level cognitive systems modular, and their difference lies in whether they also consider high-level systems modular. Choice D is incorrect. The sentence misrepresents a difference between Fodor’s and Carruthers’s hypotheses. According to the information in the notes, both Fodor and Carruthers consider the mind to be at least partly composed of innate neural structures (modules). Their difference lies in whether they consider high-level systems modular.

Question Difficulty:

Hard

Question ID 74028acf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: 74028acf

Topographic maps show the elevation of landforms above sea level. Bathymetric maps, _____ show the elevation of landforms below the sea, providing valuable information to marine geophysicists like Claudia Flores, who studies seismic data from the northeastern Caribbean.

Which choice completes the text with the most logical transition?

- A. in conclusion,
- B. for example,
- C. by contrast,
- D. afterward,

ID: 74028acf Answer

Correct Answer:

C

Rationale

Choice C is the best answer. “By contrast” logically signals that the information about bathymetric maps in this sentence—that they show landforms’ elevation below the sea—presents a direct contrast to the previous information about topographic maps showing landforms’ elevation above sea level.

Choice A is incorrect because “in conclusion” illogically signals that the information about bathymetric maps in this sentence concludes or summarizes the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps. Choice B is incorrect because “for example” illogically signals that the information about bathymetric maps in this sentence exemplifies the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps. Choice D is incorrect because “afterward” illogically signals that this sentence describes an event that chronologically follows the previous information about topographic maps. Instead, the sentence provides contrasting information about bathymetric maps.

Question Difficulty:

Medium

Question ID a7a944ed

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: a7a944ed

In astrophysics, a ring of debris orbiting a larger object within the object’s Roche limit is expected to persist as a ring, whereas a ring of debris orbiting outside this limit would likely accrete into a satellite (e.g., a moon). Bruno Morgado and colleagues, _____ detected a dense ring of material orbiting the trans-Neptunian object Quaoar at a distance of 2,500 miles, well outside the calculated Roche limit of 1,100 miles, that has remained intact.

Which choice completes the text with the most logical transition?

- A. though,
- B. for example,
- C. fittingly,
- D. likewise,

ID: a7a944ed Answer

Correct Answer:
A

Rationale

Choice A is the best answer. “Though” logically signals that the information in this sentence—that Morgado and colleagues detected a dense ring orbiting outside the Roche limit that remained intact—presents an exception to the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Such debris would be expected to accrete into a satellite, not remain intact as a ring.

Choice B is incorrect because “for example” illogically signals that the information about Morgado’s discovery exemplifies the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim. Choice C is incorrect because “fittingly” illogically signals that the information about Morgado’s discovery aligns with the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim. Choice D is incorrect because “likewise” illogically signals that the information about Morgado’s discovery is similar to the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim.

Question Difficulty:
Hard

Question ID b98b8f64

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: b98b8f64

While researching a topic, a student has taken the following notes:

- 1926: The US Congress gave the US Commerce Department authority to regulate safety standards in the fledgling commercial airline industry.
- 1938: Congress transferred this authority to a new independent government agency called the Civil Aeronautics Authority (CAA).
- 1958: Congress transferred authority from the CAA to the newly established Federal Aviation Administration (FAA).
- The FAA's first administrator, Elwood R. Quesada, updated safety standards and technologies for the era of commercial jets.
- The FAA remains the regulatory authority for airline safety.

The student wants to specify the order in which different government entities were given the authority to regulate airline safety in the US. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The CAA had the authority to regulate safety for US airlines from 1938 until 1958, at which point authority was transferred to the US Commerce Department by Elwood R. Quesada.
- B. The FAA, CAA, and the US Commerce Department all had the authority to regulate US airline safety, but they possessed this authority at different times.
- C. The FAA has regulated airline safety since it was established by the US Congress in 1958.
- D. The authority to regulate US airline safety transferred from the US Commerce Department to the CAA in 1938, then from the CAA to the FAA in 1958.

ID: b98b8f64 Answer

Correct Answer:
D

Rationale

Choice D is the best answer. The sentence specifies the order in which different government entities were given the authority to regulate US airline safety, noting that this role shifted from the US Commerce Department to the CAA in 1938, then from the CAA to the FAA in 1958.

Choice A is incorrect because it misrepresents information from the notes. The authority to regulate airline safety was transferred to the FAA in 1958, not to the US Commerce Department. Moreover, the sentence misrepresents Quesada's role as described in the notes. Choice B is incorrect. While the sentence mentions that all three entities had the authority to regulate US airline safety at different times, it doesn't specify the chronological order in which they held that authority. Choice C is incorrect. The sentence only mentions when the FAA began regulating US airline safety; it doesn't specify the order in which different government entities held that authority.

Question Difficulty:
Medium

Question ID 072666a3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: 072666a3

The tiny transistors that control the flow of electricity in modern devices may one day be made of wood. Researchers in Switzerland have found a way to use heat and chemicals to widen the grooves in dry pieces of balsa wood. _____ these grooves become wide enough that electrical conductors can be passed through them.

Which choice completes the text with the most logical transition?

- A. For example,
- B. Previously,
- C. In contrast,
- D. As a result,

ID: 072666a3 Answer

Correct Answer:

D

Rationale

Choice D is the best answer. “As a result” logically signals that the information in this sentence—that the widened grooves in balsa wood can accommodate electrical conductors—is a direct consequence of the researchers’ method described in the previous sentence (using heat and chemicals to widen the grooves).

Choice A is incorrect because “for example” illogically signals that this sentence provides an example of the researchers’ method described in the previous sentence. Instead, the sentence indicates a consequence of that method. Choice B is incorrect because “previously” illogically signals that this sentence describes an event that occurred before the researchers’ development of the method described in the previous sentence. Instead, the sentence indicates a consequence of that method. Choice C is incorrect because “in contrast” illogically signals that the information in this sentence contrasts with the previous sentence’s description of the researchers’ method. Instead, the sentence indicates a consequence of that method.

Question Difficulty:

Easy

Question ID efa2be4f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: efa2be4f

While researching a topic, a student has taken the following notes:

- The meter of a poem is the rhythmic structure or pattern of accents in its lines.
- Alliterative meter is structured by a pattern of repeated sounds.
- Quantitative meter is structured by a pattern of long and short syllables.
- The Old English poem *Widsith* uses an alliterative meter.
- The Sanskrit poem *Meghadūta* uses a quantitative meter.

The student wants to emphasize a difference between the meters of the two poems. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The poem *Widsith* is written in Old English, but *Meghadūta* is written in Sanskrit.
- B. Alliterative meter is a pattern of repeated sounds, but quantitative meter is a rhythmic structure or pattern of accents.
- C. The Sanskrit poem *Meghadūta* uses a quantitative meter, while the meter of the Old English poem *Widsith* uses a pattern of long and short syllables.
- D. The lines of the poem *Meghadūta* use a pattern of long and short syllables, whereas *Widsith's* lines use a pattern of repeated sounds.

ID: efa2be4f Answer

Correct Answer:

D

Rationale

Choice D is the best answer. Noting that *Meghadūta* uses a pattern of long and short syllables in its lines (quantitative meter) and *Widsith* uses a pattern of repeated sounds in its lines (alliterative meter), and signaling a contrast with “whereas,” the sentence emphasizes a difference between the meters of the two poems.

Choice A is incorrect. The sentence indicates that the two poems were written in different languages; it doesn’t emphasize a difference between the meters of the two poems. Choice B is incorrect. The sentence mentions the meters of the two poems but misrepresents information from the notes; the overall definition of a meter (the rhythmic structure or pattern of accents in a poem’s lines) applies to both alliterative and quantitative meters, not just quantitative. Choice C is incorrect. While the sentence emphasizes a difference between the meters of the two poems, it misrepresents information from the notes; *Widsith* uses an alliterative meter, which is structured by a pattern of repeated sounds, not a pattern of long and short syllables.

Question Difficulty:

Medium

Question ID e268c452

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: e268c452

The traditional process of Turkish paper marbling (ebru) generally proceeds like this: First, the artisan fills a shallow tray with a water bath solution. Next, the artisan adds inks or paints to the solution, which can then be manipulated into intricate designs. _____ the artisan slips paper in and out of the liquid, transferring the design onto the paper.

Which choice completes the text with the most logical transition?

- A. Actually,
- B. Therefore,
- C. Nevertheless,
- D. Finally,

ID: e268c452 Answer

Correct Answer:

D

Rationale

Choice D is the best answer. “Finally” logically signals that the information in this sentence—that the artisan slips paper in and out of the liquid to transfer the design onto paper—is the final step in the process of Turkish paper marbling, which began with what happens “first” (filling a tray with a solution) and continued with what happens “next” (adding inks or paints to the solution).

Choice A is incorrect because “actually” illogically signals that the information in this sentence about slipping paper in and out of liquid to transfer a design onto paper is unexpected in light of the previously described steps. Instead, the sentence describes the final step in the process of Turkish paper marbling. Choice B is incorrect because “therefore” illogically signals that the information in this sentence about slipping paper in and out of liquid to transfer a design onto paper is a consequence of the previously described steps. Instead, the sentence describes the final step in the process of Turkish paper marbling. Choice C is incorrect because “nevertheless” illogically signals that the information in this sentence about slipping paper in and out of liquid to transfer a design onto paper contrasts with the previously described steps. Instead, the sentence describes the final step in the process of Turkish paper marbling.

Question Difficulty:

Easy

Question ID 332e75bf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Transitions	

ID: 332e75bf

In Annie Dillard’s *Pilgrim at Tinker Creek*—where, early on, the author marvels at a single goldfish’s delicate fins but later winces when imagining a horde of goldfish laying and eating their own eggs—Dillard struggles to reconcile the complicated juxtapositions of the natural world. _____ nature’s mesmerizing intricacy and pitiless harshness prove inextricably linked for Dillard, like “two branches of the same creek.”

Which choice completes the text with the most logical transition?

- A. To that end,
- B. Ultimately,
- C. Moreover,
- D. Hence,

ID: 332e75bf Answer

Correct Answer:

B

Rationale

Choice B is the best answer. “Ultimately” logically signals that the information in this sentence—that, for Dillard, nature’s mesmerizing intricacy and pitiless harshness are inextricably linked—is the final conclusion or realization reached after her struggle to reconcile the juxtapositions of the natural world mentioned in the previous sentence.

Choice A is incorrect because “to that end” illogically signals that linking nature’s intricacy and harshness was Dillard’s deliberate goal or purpose in struggling to reconcile nature’s juxtapositions. Instead, the sentence presents her final realization after that struggle. Choice C is incorrect because “moreover” illogically signals that the information in this sentence merely adds to Dillard’s struggle to reconcile nature’s juxtapositions mentioned in the previous sentence. Instead, the sentence presents her final realization after that struggle. Choice D is incorrect because “hence” illogically signals that nature’s intricacy and harshness being linked is a direct consequence of Dillard’s struggle to reconcile the juxtapositions mentioned in the previous sentence. Instead, the sentence presents her final realization after that struggle.

Question Difficulty:

Hard

Question ID bb43fc3c

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: bb43fc3c

While researching a topic, a student has taken the following notes:

- Pedestrian malls are outdoor streets in a city or town where vehicle traffic is prohibited.
- Many pedestrian malls were built in the 19th and 20th centuries in Europe and Asia.
- Qianmen Dajie is a famous pedestrian mall in Beijing.
- It has existed since the Ming dynasty (1368–1644 CE).
- Rue Mouffetard is a famous pedestrian mall in Paris.
- It has existed since the mid-Roman Empire (117–235 CE).

The student wants to emphasize a similarity between the ages of the malls. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The Qianmen Dajie pedestrian mall has roots as far back as the Ming dynasty; likewise, Rue Mouffetard has existed for centuries.
- B. Both Qianmen Dajie and Rue Mouffetard are famous pedestrian malls, the former in Beijing and the latter in Paris.
- C. Qianmen Dajie and Rue Mouffetard are pedestrian malls, outdoor streets closed to vehicle traffic.
- D. Qianmen Dajie and Rue Mouffetard are examples of pedestrian malls, which proliferated in Europe in the 19th and 20th centuries.

ID: bb43fc3c Answer

Correct Answer:
A

Rationale

Choice A is the best answer. The sentence emphasizes a similarity between the ages of the two pedestrian malls, noting that both are relatively old—Qianmen Dajie has roots that go back hundreds of years and Rue Mouffetard has existed for centuries.

Choice B is incorrect. The sentence emphasizes that both locations are famous pedestrian malls and notes that they are in different locations; it doesn't emphasize a similarity in their ages. Choice C is incorrect. While the sentence emphasizes that both locations are pedestrian malls, it doesn't emphasize a similarity in their ages. Choice D is incorrect. The sentence explains that Qianmen Dajie and Rue Mouffetard are examples of pedestrian malls and gives information about pedestrian malls in general; it doesn't emphasize a similarity in the ages of these two malls specifically.

Question Difficulty:
Medium

Question ID e887dab1

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: e887dab1

While researching a topic, a student has taken the following notes:

- “Organ²/ASLSP (As Slow as Possible)” is a musical piece by avant-garde composer John Cage.
- A specially designed automated organ in St. Burchardi Church in Halberstadt, Germany, began playing the piece in 2001.
- It is scheduled to stop playing the piece in 2640.
- The performance will last 639 years.
- It will be the longest continuous musical performance in history.

The student wants to indicate how long John Cage’s musical piece will last. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. John Cage is the composer of the musical piece “Organ²/ASLSP (As Slow as Possible).”
- B. “Organ²/ASLSP (As Slow as Possible)” is a musical piece currently being played in St. Burchardi Church in Halberstadt, Germany.
- C. Lasting 639 years, John Cage’s musical piece will be the longest continuous musical performance in history.
- D. An organ in St. Burchardi Church in Halberstadt, Germany, began playing a musical piece by avant-garde composer John Cage.

ID: e887dab1 Answer

Correct Answer:

C

Rationale

Choice C is the best answer. The sentence indicates how long John Cage’s musical piece will last, noting that it will last 639 years and be the longest continuous musical performance in history.

Choice A is incorrect. The sentence identifies John Cage as the composer and provides the name of the musical piece; it doesn’t indicate how long the piece will last. Choice B is incorrect. The sentence provides the name of the musical piece and where it is currently being played; it doesn’t indicate how long the piece will last. Choice D is incorrect. The sentence mentions where the musical piece is being played and identifies John Cage as the composer; it doesn’t indicate how long the piece will last.

Question Difficulty:

Easy

Question ID fb3abe38

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: fb3abe38

While researching a topic, a student has taken the following notes:

- In a 2020 study, researchers in California investigated how many potential nesting sites female wood ducks visited during the nesting season.
- The researchers placed nest boxes throughout the survey area and tagged 138 female wood ducks with radio frequency ID trackers.
- These trackers recorded how many nest boxes each duck visited.
- 67 ducks (48.5%) visited only one nest box.
- 18 ducks (13.0%) visited 10 or more nest boxes.
- Younger ducks were more likely to visit multiple nest boxes.

The student wants to present the methods used in the 2020 study. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. By recording how many nest boxes each duck visited, the researchers discovered that only a relatively small percentage (13.0%) of the ducks visited 10 or more nest boxes.
- B. After tracking how many nest boxes the 138 wood ducks visited, the researchers found that the younger ducks tended to visit more nest boxes than the older ducks.
- C. The researchers tagged 138 female wood ducks with radio frequency ID trackers and recorded how many nest boxes each duck visited during the nesting season.
- D. The researchers investigated each nesting site for signs that it had been visited by the female wood ducks.

ID: fb3abe38 Answer

Correct Answer:
C

Rationale

Choice C is the best answer. The sentence presents the methods used in the study, noting that researchers tagged 138 female wood ducks with radio frequency ID trackers and recorded the number of nest boxes each duck visited.

Choice A is incorrect. While the sentence mentions an aspect of the study’s design (that the researchers recorded the number of nest boxes the wood ducks visited), it primarily focuses on a finding of the study rather than the methods the researchers used.

Choice B is incorrect. While the sentence mentions an aspect of the study’s design (that the researchers tracked the number of nest boxes the wood ducks visited), it primarily focuses on a finding of the study rather than the methods the researchers used.

Choice D is incorrect. The sentence misrepresents information from the notes. The researchers used radio frequency ID trackers to record the ducks’ visits; they didn’t investigate each site to look for evidence that it had been visited.

Question Difficulty:
Medium

Question ID 77e3b3b3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: 77e3b3b3

While researching a topic, a student has taken the following notes:

- 2024: Spain and Portugal sponsored a workshop to address recent encounters between Iberian orcas and marine vessels off the Iberian Peninsula.
- Many of the 637 documented incidents involved pods of orcas damaging vessels by ramming, nudging, or biting the rudders.
- Studies of Iberian orcas suggest recent increases in tuna populations have reduced the time the orcas spend hunting by 99%.
- Researchers believe this shift has increased the number of interactions between marine vessels and understimulated orcas.
- The workshop advised mariners to avoid orcas pending further testing of the efficacy of TAST, a harmless acoustic deterrent.

The student wants to make and support a claim about Iberian orca behavior. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The recent destructive behavior of Iberian orcas may be the result of understimulation, given that orcas’ interactions with marine vessels have increased as the orcas have spent less time hunting.
- B. As supported by the workshop’s analysis of 637 encounters between vessels and Iberian orcas, TAST is a harmless and effective acoustic deterrent.
- C. In 2024, Spain and Portugal sponsored a workshop that addressed incidents where pods of Iberian orcas were ramming, nudging, or biting the rudders of vessels.
- D. Tuna populations have increased by approximately 99% off the Iberian Peninsula due to changes in the hunting behavior of Iberian orcas.

ID: 77e3b3b3 Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The sentence makes and supports a claim about Iberian orca behavior, claiming that the orcas’ destructive behavior may be the result of understimulation and citing as support the fact that as orcas have spent less time hunting (a stimulating activity), encounters with vessels have increased.

Choice B is incorrect. While the sentence makes a claim about an orca deterrent, it misrepresents information from the notes. The workshop advised avoiding orcas pending further testing of TAST’s efficacy; it didn’t claim that TAST was effective. Choice C is incorrect. The sentence describes a workshop that addressed the orcas’ behavior; it doesn’t make or support a claim about their behavior. Choice D is incorrect. While the sentence does make a claim about orcas’ hunting behavior, it misrepresents information from the notes; the notes state that increased tuna populations have reduced orcas’ hunting time by 99%, not that tuna populations have increased by 99% because of the orcas’ behavior.

Question Difficulty:

Medium

Question ID e1453c88

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: e1453c88

While researching a topic, a student has taken the following notes:

- 1914: British explorer Ernest Shackleton and a small crew embarked on an expedition to Antarctica.
- 1915: Shackleton's ship *Endurance* became stuck in ice before eventually breaking apart and sinking.
- 1916: After more harrowing sea-ice adventures, the entire crew was rescued.
- 1959: Historian Alfred Lansing wrote a book called *Endurance: Shackleton's Incredible Voyage*.
- 2001: Filmmaker George Butler released a documentary called *The Endurance: Shackleton's Legendary Antarctic Expedition*.
- 2022: The wreckage of *Endurance* was discovered at the bottom of Antarctica's Weddell Sea.

The student wants to provide a historical overview of the Shackleton expedition. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Leaving in 1914 for Antarctica, Shackleton and his crew underwent many harrowing sea-ice adventures, including losing their ship in 1915, before being rescued in 1916.
- B. In 1914, the Shackleton expedition sailed to Antarctica, where, in 1916, they rescued the crew of a ship that had sunk, *Endurance* (the wreckage of which was discovered in 2022).
- C. Shackleton's expedition has inspired a 1959 book, a 2001 film, and a 2022 discovery.
- D. Alfred Lansing wrote about the history of Shackleton's 1914–16 expedition in the book *Endurance: Shackleton's Incredible Voyage* (1959); years later, in 2001, George Butler released a documentary about the expedition.

ID: e1453c88 Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The sentence provides a historical overview of the Shackleton expedition, noting that the explorers left for Antarctica in 1914, lost their ship in 1915, and were rescued in 1916.

Choice B is incorrect. The sentence misrepresents information from the notes; Shackleton and his crew were themselves rescued in 1916—they weren't rescuing others. Choice C is incorrect. The sentence provides examples of works and discoveries inspired by the expedition; it doesn't provide an overview of the expedition itself. Choice D is incorrect. The sentence provides examples of works made about the expedition; it doesn't provide an overview of the expedition itself.

Question Difficulty:

Medium

Question ID 3a1239d2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 3a1239d2

If an animal can recognize itself in a reflective surface (“the mirror test”), it is considered to have self-awareness. In a recent study, scientists _____ for evidence of self-awareness in snakes, species that rely primarily on olfactory rather than visual processing, adapted the test to foreground smell, modifying the scent trails of North American eastern garter snakes and African ball pythons.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. searched
- B. searching
- C. were searching
- D. have searched

ID: 3a1239d2 Answer

Correct Answer:

B

Rationale

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “searching” is correctly used to form a supplementary element that modifies the subject “scientists,” indicating that the scientists who adapted the test were looking for evidence of self-awareness in snakes.

Choice A is incorrect because it results in an ungrammatical sentence. The finite past tense verb “searched” can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for. Choice C is incorrect because it results in an ungrammatical sentence. The finite past progressive verb “were searching” can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for. Choice D is incorrect because it results in an ungrammatical sentence. The finite present perfect verb “have searched” can’t be used in this way to form a supplementary element that indicates what evidence the scientists who adapted the test were looking for.

Question Difficulty:

Hard

Question ID 035fd57e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 035fd57e

The rough frog is a species of amphibian native to Australia. Currently, the frog’s range _____ parts of northern New South Wales and southeastern Queensland.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. includes
- B. included
- C. will have included
- D. had included

ID: 035fd57e Answer

Correct Answer:
A

Rationale

Choice A is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the present tense verb “includes,” used in conjunction with the word “currently,” correctly indicates that the frog’s current range includes parts of northern New South Wales and southeastern Queensland.

Choice B is incorrect because the past tense verb “included” doesn’t indicate that the frog’s range currently includes parts of northern New South Wales and southeastern Queensland. Choice C is incorrect because the future perfect tense “will have included” doesn’t indicate that the frog’s range currently includes parts of northern New South Wales and southeastern Queensland. Choice D is incorrect because the past perfect tense “had included” doesn’t indicate that the frog’s range currently includes parts of northern New South Wales and southeastern Queensland.

Question Difficulty:
Easy

Question ID 4dcedc31

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: 4dcedc31

For scientists to produce new iron nanoparticles of a specific size or strength, they must first be able to monitor reactions between oxygen and existing iron nanoparticles at a near-atomic level of detail. Fortunately, chemistry _____ and his colleagues at Temple University recently developed a new approach that does just that.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. professor Yugang Sun
- B. professor Yugang Sun,
- C. professor, Yugang Sun,
- D. professor, Yugang Sun

ID: 4dcedc31 Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed between the proper noun “Yugang Sun” and the title that describes Sun, “chemistry professor.” Furthermore, no punctuation is needed after “Sun” because “chemistry professor Yugang Sun and his colleagues at Temple University” functions as the coordinated subject of the sentence, and together Sun and colleagues performed the action of developing a new approach to producing iron nanoparticles.

Choice B is incorrect because no punctuation is needed between the proper noun “Yugang Sun” and the coordinated noun phrase “and his colleagues at Temple University.” Choice C is incorrect because no punctuation is needed before or after the proper noun “Yugang Sun.” Setting off the professor’s name with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Choice D is incorrect because no punctuation is needed between the title “chemistry professor” and the proper noun “Yugang Sun.”

Question Difficulty:

Hard

Question ID 674e59a3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 674e59a3

Following her debut album release in 2002, Mexican singer-songwriter Natalia Lafourcade quickly shot to fame. By 2023, she _____ one of the most celebrated musicians in Latin America, having released twelve albums and won seventeen Latin Grammy awards—more than any other female artist in history.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. will become
- B. becomes
- C. will have become
- D. had become

ID: 674e59a3 Answer

Correct Answer:
D

Rationale

Choice D is the best answer. The convention being tested is the use of verbs to express tense in a sentence. The past perfect tense indicates an action that was completed before another past action. In this choice, the past perfect verb “had become,” together with the supplemental phrase “by 2023,” indicates that Lafourcade earned her status as one of the most celebrated musicians in Latin America before 2023.

Choice A is incorrect because the future tense “will become” doesn’t indicate that Lafourcade earned her celebrated status before 2023. Choice B is incorrect because the present tense “becomes” doesn’t indicate that Lafourcade earned her celebrated status before 2023. Choice C is incorrect because the future perfect tense “will have become” doesn’t indicate that Lafourcade earned her celebrated status by 2023.

Question ID 82a76537

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: 82a76537

Key-value pairs are an important aspect of JavaScript Object Notation (JSON), an electronic file format for storing and transmitting data. Keys function as labels, while values contain the actual information. In a JSON file storing data about fire belly _____ instance, you could encounter a key such as “species” with the associated value of “*Cynops orientalis*.”

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. newts. For
- B. newts, for
- C. newts: for
- D. newts; for

ID: 82a76537 Answer

Correct Answer:

B

Rationale

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. The comma after “newts” pairs with the comma after “instance” to separate the supplementary element “for instance” from the rest of the sentence. The supplementary element appears between the prepositional phrase (“In...newts”) and the main clause of the sentence (“you... *orientalis*”) and signals that the sentence is presenting an example of how keys and values function in JSON files.

Choice A is incorrect because it results in a sentence fragment (“In a JSON file storing data about fire belly newts”). Choice C is incorrect because a colon can’t be paired with a comma in this way to separate the supplementary element “for instance” from the rest of the sentence. Choice D is incorrect because a semicolon can’t be paired with a comma in this way to separate the supplementary element “for instance” from the rest of the sentence.

Question Difficulty:

Medium

Question ID e060dd6b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: e060dd6b

Recordings of electrical activity in the brain, _____ increased activity in brain areas associated with suppressing motor functions.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. electrograms show that while responding to hypothetical match scenarios, the most highly skilled soccer players have
- B. the most highly skilled soccer players responding to hypothetical match scenarios have electrograms that show
- C. responses to hypothetical match scenarios show that the most highly skilled soccer players have electrograms with
- D. hypothetical match scenario responses show that the most highly skilled soccer players captured in electrograms have

ID: e060dd6b Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun “electrograms” the subject of the sentence and places it immediately after the modifying phrase “recordings of electrical activity in the brain.” In doing so, this choice clearly establishes that electrograms—and not other nouns or noun phrases in the sentence—are recordings of electrical activity in the brain.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “the most highly skilled soccer players” immediately after the modifying phrase illogically suggests that the players are recordings of electrical activity in the brain. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “responses to hypothetical match scenarios” immediately after the modifying phrase illogically suggests that these responses are recordings of electrical activity in the brain. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “hypothetical match scenario responses” immediately after the opening phrase illogically suggests that these responses are recordings of electrical activity in the brain.

Question Difficulty:

Hard

Question ID 6fdddabf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: 6fdddabf

The part of a compound that determines the compound’s color is _____ the chromophore. One example of a chromophore is hemoglobin, which gives human blood its red color.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. called,
- B. called
- C. called—
- D. called;

ID: 6fdddabf Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is punctuation use between a verb and its complement. No punctuation is needed between the verb “is called” and its complement “the chromophore.” The complement helps complete the idea of the verb—in this case, it explains what the part of a compound that determines the compound’s color is called—and any punctuation between the two results in an ungrammatical sentence.

Choice A is incorrect because no punctuation is needed between the verb and its complement. Choice C is incorrect because no punctuation is needed between the verb and its complement. Choice D is incorrect because no punctuation is needed between the verb and its complement.

Question Difficulty:
Easy

Question ID d198997b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: d198997b

Cy Twombly, a US painter and sculptor, created many large-scale abstract works, such as his 10-painting series *Fifty Days at Iliam*. In these works, Twombly’s artistic style is exemplified by his use of graffiti-like _____ often incorporate words or phrases from poetry and mythology.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. scribbles: that
- B. scribbles that
- C. scribbles; that
- D. scribbles. That

ID: d198997b Answer

Correct Answer:

B

Rationale

Choice B is the best answer. The convention being tested is the use and punctuation of a relative clause. This choice correctly uses the relative pronoun “that” and no punctuation to create an integrated relative clause that provides essential information about the noun phrase (“graffiti-like scribbles”) that it modifies.

Choice A is incorrect because no punctuation is needed between the integrated relative clause beginning with “that often” and the noun phrase that it modifies (“graffiti-like scribbles”). Choice C is incorrect because no punctuation is needed between the integrated relative clause beginning with “that often” and the noun phrase that it modifies (“graffiti-like scribbles”). Choice D is incorrect because no punctuation is needed between the integrated relative clause beginning with “that often” and the noun phrase that it modifies (“graffiti-like scribbles”).

Question Difficulty:

Medium

Question ID cfe23776

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: cfe23776

According to the original text of the US Constitution, written in 1787, the presidential candidate receiving the second-most Electoral College votes becomes vice president. The 12th amendment, ratified in _____ separated the elections for the two offices.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. 1804—
- B. 1804,
- C. 1804:
- D. 1804

ID: cfe23776 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. The comma after “1804” pairs with the comma after “amendment” to separate the supplementary element “ratified in 1804” from the rest of the sentence. This supplementary element functions to provide additional information on the term “12th amendment,” and the pair of commas indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because a dash can’t be paired with a comma in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because a colon can’t be paired with a comma in this way to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it fails to use appropriate punctuation to separate the supplemental element from the rest of the sentence.

Question Difficulty:
Medium

Question ID 75eb5242

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: 75eb5242

Many companies have simplified their products’ packaging designs in recent years, but _____ Researcher Lan Anh Nu Ton and her colleagues designed a research study to find out.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. consumers actually do prefer this simpler style.
- B. do consumers actually prefer this simpler style?
- C. do consumers actually prefer this simpler style.
- D. consumers actually do prefer this simpler style?

ID: 75eb5242 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a question mark to punctuate the interrogative clause “do consumers actually prefer this simpler style,” which asks a direct question at the end of the sentence. This is the question that the researchers in the next sentence were trying to investigate.

Choice A is incorrect because the context requires an interrogative clause. The declarative clause “consumers actually do prefer this simpler style” incorrectly indicates the consumers’ preference was already known, whereas the researchers had yet to find this out. Choice C is incorrect because a period can’t be used in this way to punctuate an interrogative clause at the end of a sentence. Choice D is incorrect because a question mark can’t be used in this way to punctuate a declarative clause, such as “consumers actually do prefer this simpler style,” at the end of a sentence.

Question Difficulty:
Easy

Question ID 772835db

SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 772835db

Most of the ice found on Earth is ice Ih, distinguished by a crystalline structure in which molecules form a hexagonal pattern. Amorphous ice, on the other hand, constitutes most of the ice in the ultrafrigid environment of outer space. Defined by a disorganized molecular structure, _____

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. ice Ih contains crystals, whereas amorphous ice, which lacks the thermal energy to form them, does not.
- B. amorphous ice lacks the thermal energy to form the crystals found in ice Ih.
- C. the lack of thermal energy in amorphous ice explains its inability to form the crystals found in ice Ih.
- D. ice Ih differs from amorphous ice in that it possesses the thermal energy to form crystals.

ID: 772835db Answer

Correct Answer:

B

Rationale

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “amorphous ice” the subject of the sentence and places it immediately after the modifying phrase “defined...structure.” In doing so, this choice clearly establishes that amorphous ice—and not another noun in the sentence—is being described as having a disorganized molecular structure.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the lack of thermal energy” immediately after the modifying phrase illogically suggests that the lack of thermal energy has a disorganized molecular structure. Choice D is incorrect because it results in a dangling modifier. The placement of “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern.

ID: eee7536f

On March 27, 2004, after nine years as a professional boxer, Isra Girgrah retired. The Yemeni American athlete _____ her career with a record of twenty-eight wins, three losses, and two ties.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. finish
- B. has been finishing
- C. finished
- D. will be finishing

ID: eee7536f Answer

Correct Answer:
C

Rationale

Choice C is the best answer. The convention being tested is the use of a verb to express tense in a sentence. In this choice, the past tense verb “finished” is consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004.

Choice A is incorrect because the present tense verb “finish” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004. Furthermore, the plural verb “finish” doesn’t agree in number with the sentence’s singular subject “The Yemeni American athlete.” Choice B is incorrect because the present perfect progressive tense verb “has been finishing” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004. Choice D is incorrect because the future progressive tense verb “will be finishing” isn’t consistent with the other past tense verb (“retired”) used to refer to Girgrah’s retirement in 2004.

Artist Yto Barrada’s exhibition *Ways to Baffle the Wind* incorporates sculptures, textiles, and films. Barrada’s pieces, utilizing elements as disparate as plant-dyed fabrics, wire crab traps filled with stones, and cotton balls dangling above a fan, _____ the ways humans attempt to organize and regulate nature.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. explore
- B. has explored
- C. explores
- D. exploring

ID: 9994ae0d Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb “explore” agrees in number with the plural subject “Barrada’s pieces.”

Choice B is incorrect because the singular verb phrase “has explored” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice C is incorrect because the singular verb “explores” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice D is incorrect because the nonfinite participle “exploring” doesn’t supply the main clause with a finite verb.

Question Difficulty:

Hard

Question ID 8459dc2f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	

ID: 8459dc2f

When using a search engine, many people click just the first one or two results. Click restraint is the practice of scanning a search results page and evaluating what you see before deciding which link _____

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. should you choose.
- B. you should choose?
- C. should you choose?
- D. you should choose.

ID: 8459dc2f Answer

Correct Answer:
D

Rationale

Choice D is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a period to punctuate a declarative sentence that ends with an indirect question (“which link you should choose.”)

Choice A is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as “which link should you choose.” Choice B is incorrect. It’s unconventional to use a question mark in this way to punctuate a declarative clause that presents an indirect question, such as “which link you should choose.” Choice C is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as “which link should you choose.”

ID: 12013e06

In rural Minnesota, ecologist Leroy Walston conducted a study to determine whether seeding solar panel fields with wildflowers could bolster pollinator populations in nearby food crops. Walston’s findings indicate that—assuming solar panel installers’ _____ practice has the potential to increase the number of native bees in crops near solar fields throughout the Midwest by up to 20 percent.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. cooperation, this
- B. cooperation—this
- C. cooperation: this
- D. cooperation this

ID: 12013e06 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a dash after “cooperation” to pair with the dash after “that” to separate the supplementary element “assuming solar panel installers’ cooperation” from the rest of the sentence.

Choice A is incorrect because a comma can’t be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because a colon can’t be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it fails to use appropriate punctuation to separate the supplemental element from the rest of the sentence.

Question Difficulty:
Medium

Question ID f1c5157d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: f1c5157d

Established in 1936 by African American novelist Richard Wright, _____ it would become a vital part of the creative movement known as the Chicago Black Renaissance.

- Which choice completes the text so that it conforms to the conventions of Standard English?
- A. the South Side Writers Group provided a valuable forum for Chicago writers to share ideas;
 - B. Chicago writers in the South Side Writers Group had a valuable forum for sharing ideas;
 - C. writers shared ideas at a valuable forum known as the South Side Writers Group in Chicago;
 - D. Chicago was where the South Side Writers Group provided a valuable forum for writers to share ideas;

ID: f1c5157d Answer

Correct Answer:
A

Rationale

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the South Side Writers Group” the subject of the sentence and places it immediately after the modifying phrase “established in 1936 by African American novelist Richard Wright.” In doing so, this choice clearly indicates that the South Side Writers Group—and not another noun in the sentence—was established in 1936 by Richard Wright.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “Chicago writers” immediately after the modifying phrase illogically suggests that the Chicago writers were established in 1936 by Richard Wright. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “writers” immediately after the modifying phrase illogically suggests that the writers were established in 1936 by Richard Wright. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “Chicago” immediately after the modifying phrase illogically suggests that Chicago was established in 1936 by Richard Wright.

Question Difficulty:
Medium

Question ID 96a904c5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 96a904c5

The musical scores of Japanese composer Hiroyuki Sawano are famous for their mysterious titles. Laden with emojis and seemingly meaningless words, and driven largely by Sawano’s “personal feeling and mood,” _____

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. the listener can approach each piece free from expectations because of the titles.
- B. the titles allow the listener to approach each piece free from expectations.
- C. each piece can be approached by the listener free from expectations because of the titles.
- D. the listener’s approach to each piece because of the titles can be free from expectations.

ID: 96a904c5 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the titles” the subject of the sentence and places it immediately after the modifying phrases “laden with emojis and seemingly meaningless words, and driven largely by Sawano’s ‘personal feeling and mood.’” In doing so, this choice clearly establishes that the titles—and not another noun in the sentence—are being described as laden with emojis and driven by Sawano’s personal feeling.

Choice A is incorrect because it results in a dangling modifier. The placement of “the listener” immediately after the modifying phrases illogically suggests that the listener, rather than the titles, is laden with emojis and driven by Sawano’s personal feeling. Choice C is incorrect because it results in a dangling modifier. The placement of “each piece” (i.e., musical score) immediately after the modifying phrases illogically suggests that the pieces, rather than the titles of the pieces, are laden with emojis and driven by Sawano’s personal feeling. Choice D is incorrect because it results in a dangling modifier. The placement of “the listener’s approach” immediately after the modifying phrases illogically suggests that the listener’s approach, rather than the titles, is laden with emojis and driven by Sawano’s personal feeling.

Question Difficulty:
Medium

Question ID fa07bcb6

Ganga is a folk singing tradition that originated in the Dinaric Alps in southern Europe. Ganga singers sing different melodies at the same time. The clashing notes can echo a long way across the mountains, which is why _____

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. ganga has been used as a communication method?
- B. ganga has been used as a communication method.
- C. has ganga been used as a communication method.
- D. has ganga been used as a communication method?

ID: fa07bcb6 Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a period to punctuate a declarative sentence ending with a relative clause that presents an indirect question (“why ganga has been used as a communication method.”)

Choice A is incorrect. It’s unconventional to use a question mark to punctuate a declarative sentence that presents an indirect question. Choice C is incorrect. The structure requires a declarative clause at the end of the sentence, not an interrogative clause that asks a direct question, such as “has ganga been used as a communication method.” Choice D is incorrect. The structure requires a declarative clause at the end of the sentence, not an interrogative clause that asks a direct question, such as “has ganga been used as a communication method.”

Question Difficulty:

Question ID 7c766ceb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: 7c766ceb

A popular suite of mapping and spatial analysis software, ArcGIS enables cartographers like Karachi Cartography founder Namra Khalid _____ maps by analyzing and arranging raw geospatial data.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. create
- B. to create
- C. creating
- D. created

ID: 7c766ceb Answer

Correct Answer:
B

Rationale

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite to-infinitive verb “to create” is correctly used to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps (by analyzing and arranging certain data).

Choice A is incorrect because it results in an ungrammatical sentence. The finite verb “create” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite participle “creating” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice D is incorrect because it results in an ungrammatical sentence. The finite verb “created” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps.

Tracy Fullerton’s *Walden, a game*, an unlikely fusion of the writings of nineteenth-century transcendentalist Henry David Thoreau with today’s open-world video games, _____ players to explore a digital version of Walden Pond, the idyllic natural setting featured in Thoreau’s book *Walden*.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. invites
- B. invite
- C. are inviting
- D. have invited

ID: ac7b8d04 Answer

Correct Answer:

A

Rationale

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb “invites” agrees in number with the singular subject “Tracy Fullerton’s *Walden, a game*.”

Choice B is incorrect because the plural verb “invite” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.” Choice C is incorrect because the plural verb “are inviting” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.” Choice D is incorrect because the plural verb “have invited” doesn’t agree in number with the singular subject “Tracy Fullerton’s *Walden, a game*.”

Instead of sleeping on soft pillows, ancient Egyptians slept on hard, elevated headrests, their design _____ airflow, protection from insects, and hairstyle maintenance over comfort.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. had prioritized
- B. was prioritizing
- C. prioritized
- D. prioritizing

ID: 81f09e07 Answer

Correct Answer:
D

Rationale

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “prioritizing” is correctly used to form a supplementary element that modifies “their design,” describing what the headrests’ design prioritized.

Choice A is incorrect because it results in a comma splice. The finite past perfect verb “had prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice B is incorrect because it results in a comma splice. The finite past progressive verb “was prioritizing” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice C is incorrect because it results in a comma splice. The finite past tense verb “prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses.

Helical _____ widely understood to confer stability and efficiency in the locomotion of a variety of microscopic organisms—including bacteria, eukaryotic algae, and ciliates—bestows similar advantages, albeit via different propulsive modes, to larger oceanic macroplanktons, such as salps.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. swimming, is
- B. swimming is
- C. swimming has been
- D. swimming,

ID: d222f7d9 Answer

Correct Answer:
D

Rationale

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. The comma after “swimming” pairs with the dash after “ciliates” to offset the supplementary element (“widely...ciliates”) that interrupts the main clause of the sentence.

Choice A is incorrect. Adding the verb “is” here creates an ungrammatical sentence structure with two main verbs (“is” and “bestows”) without appropriate punctuation and/or conjunction. Choice B is incorrect because it fails to offset the supplementary element with appropriate punctuation. Furthermore, adding the verb “is” here creates an ungrammatical sentence that has two finite verbs (“is” and “bestows”) without appropriate punctuation and/or conjunction. Choice C is incorrect because it fails to offset the supplementary element with appropriate punctuation. Furthermore, adding the verb “has been” here creates an ungrammatical sentence that has two finite verbs (“has been” and “bestows”) without appropriate punctuation and/or conjunction.
